Better than any Savings Bank.

AN HONEST ENTERPRISE THAT SMALL INVESTORS CAN SAFELY INVEST IN AND BE ABSOLUTELY CERTAIN TO RECEIVE MORE THAN 8 PER CENT. YEARLY INTEREST ON THEIR MONEY, **INVESTED IN GUARANTEED SHARES OF THE**

ATLANTIC-PACIFIC RAILWAY TUNNEL CO.

Each share bought being fully paid for, non-assessable, and making its owner one of the actual owners in all its lands, mines, tunnels, mill sites, water-powers, rentals, gold, silver, copper, lead, and other minerals, profits, etc., of the above-named company, with NO PERSONAL LIABILITY whatever to share owners; no chance or liability to be frozen out or to lose your shares, till you sell them of your own accord. All money paid for shares, on which 8% yearly interest or dividends is guaranteed, draws interest from the date the shares are purchased from the company.

700,000. Par Value of Shares, $10 each. Present Selling Price of Guaranteed Shares, $6 each.

No Fewer Than TWO SHARES Will be Sold to any One Person.

Twelve dollars bring	$1.00 per year.
Eighteen dollars bring	1.50 per year
Twenty-four dollars bring	2.00 per year.
Thirty dollars bring	2.50 per year.
Thirty-six dollars bring	3.00 per year.
Forty-two dollars bring	3.50 per year.
Forty-eight dollars bring	4.00 per year.
Fifty four dollars bring	4.50 per year.
Sixty dollars bring	5.00 per year.
Sixty-six dollars bring	5.50 per year.
Seventy-two dollars bring	6.00 per year.
Seventy-eight dollars bring	6.50 per year.
Eighty-four dollars bring	7.00 per year.
Ninety dollars bring	7.50 per year.
Ninety-six dollars bring	8.00 per year.

This is Fifty Cents a Year Cash on each Six Dollars invested. Any person can purchase Two or More Shares for themselves, their parents, or children.

Work was begun on this great, substantial enterprise in 1880. Since that time work has progressed as means could be raised from sale of shares in the enterprise, and applying the proceeds to the securing of an immensely valuable estate, and in carrying on work till now the workmen have cut clear through the outside granite wall, a distance of 2000 feet, and now are in the first good mineral-bearing vein, 1900 feet in and 1600 feet below the surface.

The Atlantic-Pacific Railway Tunnel will save 225 miles of travel between points now reached by rail. It will open a country larger than the State of New York that has no railroads. It will send millions of tons of freight and hundreds of thousands of passengers through the mountains, and each ton of freight and each passenger will pay only a reasonable toll for their saving of wear, tear, distance, and expense. This will bring to the Company a revenue each year that will more than pay interest on its bonds. Besides, it will yield to a railroad tens of thousands of tons of freight coming direct from the bowels of the mountains in the form of gold, silver, copper, and lead. This mineral must all be transported to market. It must go on cars. It will belong to the share-owners in the Tunnel Company. The proceeds of sales will be divided between them in proportion to the number of shares each person owns.

The Rocky Mountain Mining Review, speaking of the Atlantic-Pacific Railway editorially, says:

The magnitude of this great enterprise is greater than the public are aware of. Of all the bold projects ever started this is the greatest in very many respects.

1. It cuts all the way through strong, rich veins of gold, silver, and lead ore, at enormous depth.
2. It will let out tens upon tens of millions of dollars' worth of the precious metal that are known to be in this belt of mountains, and proved by the large number of big veins already discovered on the surface, which this Tunnel will cut at right angles.
3. It will prove to the entire world the advantage of deep mining.
4. It will develop men of pluck and ability, and machinery that will be needed, or its like, in other great projects of this kind of tunelling.
5. It will give employment to an immense force of sober, skilled labor, and reward the same.
6. It will call the attention of the entire world more and more to Colorado, and bring to this State thousands of dollars for stock as shares in the profits of this great work, and return millions to those who invest.
7. It will immensely increase the product of gold and silver for general use.
8. It will open the way for travel and freight through, instead of over, the Rocky Mountains.

First-Class Endorsement.

Hon. Wolfe Londoner, a prominent business man of Denver, a large wholesale grocer, and Chairman of the Board of County Commissioners, authorizes us to say to the public:

The Atlantic-Pacific Railway Tunnel is at the head of the very best enterprises ever started in Colorado, not only for the purpose of mining, but for the benefit of the entire State. I consider it a safe and good project for those who invest money therein. From what I heard of the great work in Georgetown, Idaho Springs, and other places, from business men and practical miners, who are conversant with the progress of the work, I am satisfied the management is honest, vigorous, and intelligent; that is all that can be asked by shareholders or those who are not yet interested in the good name and welfare of Colorado.

I consider your plan of opening those great deposits of ore, by means of the Atlantic-Pacific Railway Tunnel, as the only *true and economical way* to open mines to *large profits*.

A limited number of First Mortgage 8 Per Cent. Bonds of par value $250 each for 17½ years yet to run, for sale, interest payable semi-annually.

Persons remitting for two or more guaranteed shares can at the same time order more shares reserved, to be paid within thirty days from the issuing of the shares at first ordered under this offer. Printed matter describing the Tunnel and its object sent to all who apply. Address all orders to

M. M. POMEROY, Pres., A-P. R. T. Co., 234 Broadway, New York City.

BUFFALO LITHIA SPRINGS OF VIRGINIA.

THIS WATER A POWERFUL AND THE ONLY KNOWN SOLVENT OF STONE IN THE BLADDER.

CASE OF COL. THOMAS H. HOLT, LIEUTENANT-GOVERNOR OF THE STATE OF NORTH CAROLINA. HE DISCHARGES ONE AND A HALF OUNCES OF CALCULI UNDER ITS ACTION. HIS CASE STATED BY HIS FAMILY PHYSICIAN, DR. E. C. LAIRD, OF HAW RIVER, N. C.

COL. THOMAS H. HOLT, Lieutenant-Governor of North Carolina.

STATEMENT OF DR. LAIRD. From the Maryland "Medical Journal" of Nov. 17, 1888.

"The relief afforded by BUFFALO LITHIA WATER to a patient of mine, Col. H., of this place, a sufferer from RENAL CALCULI, is, I think, worthy of some record. The 1st of May last he came under my care subject to frequent attacks of NEPHRITIC COLIC. Except as to the usual treatment for the relief of present suffering, I put him EXCLUSIVELY UPON BUFFALO LITHIA WATER, SPRING NO. 2, under the influence of which he in a few weeks passed four CALCULI weighing from two to three grains each, which was followed by a disappearance of symptoms. Notwithstanding, however, the continued use of the water, after a short interval there was a return of these attacks with increase both of frequency and severity, when he made a visit to the Buffalo Lithia Springs, where he used the water six weeks with the following results: Ten days after arrival he began to discharge at intervals large quantities of CALCULI and SAND, which continued for several weeks, and afterwards gradually diminished, until at the expiration of the six weeks, there was only occasionally, and barely perceptible upon minute examination, a slight sandy deposit in the urine. At the same time improvement in the general condition of the patient was very marked.

"The amount of CALCULOUS matter discharged may safely be estimated at from one to one and a half ounces. Under microscopic examination it was evident, I think, that the CALCULI WERE ORIGINALLY PARTS OF LARGER FORMATIONS DISSOLVED BY THE ACTION OF THE WATER. Analysis made by Dr. F. S. Whaley, Resident Physician at the Springs AND CONSULTING PHYSICIAN IN THE CASE, showed it to be URIC ACID.

"Six weeks have elapsed since he left the Springs. Use of water continued. THE URINE IS FREE FROM SEDIMENT AND NORMAL.

"It is PROPER FOR ME to add that I was in constant attendance upon Col. H. during his stay at the Springs."

WATER IN CASES OF ONE DOZEN HALF-GALLON BOTTLES, $5 PER CASE.

THOMAS F. COODE, Proprietor, Buffalo Lithia Springs, Va.

THE GENUINE IMPORTED NATURAL CARLSBAD SPRUDEL SALT

Is obtained from the Sprudel Spring by evaporation.

NEW-YORK.

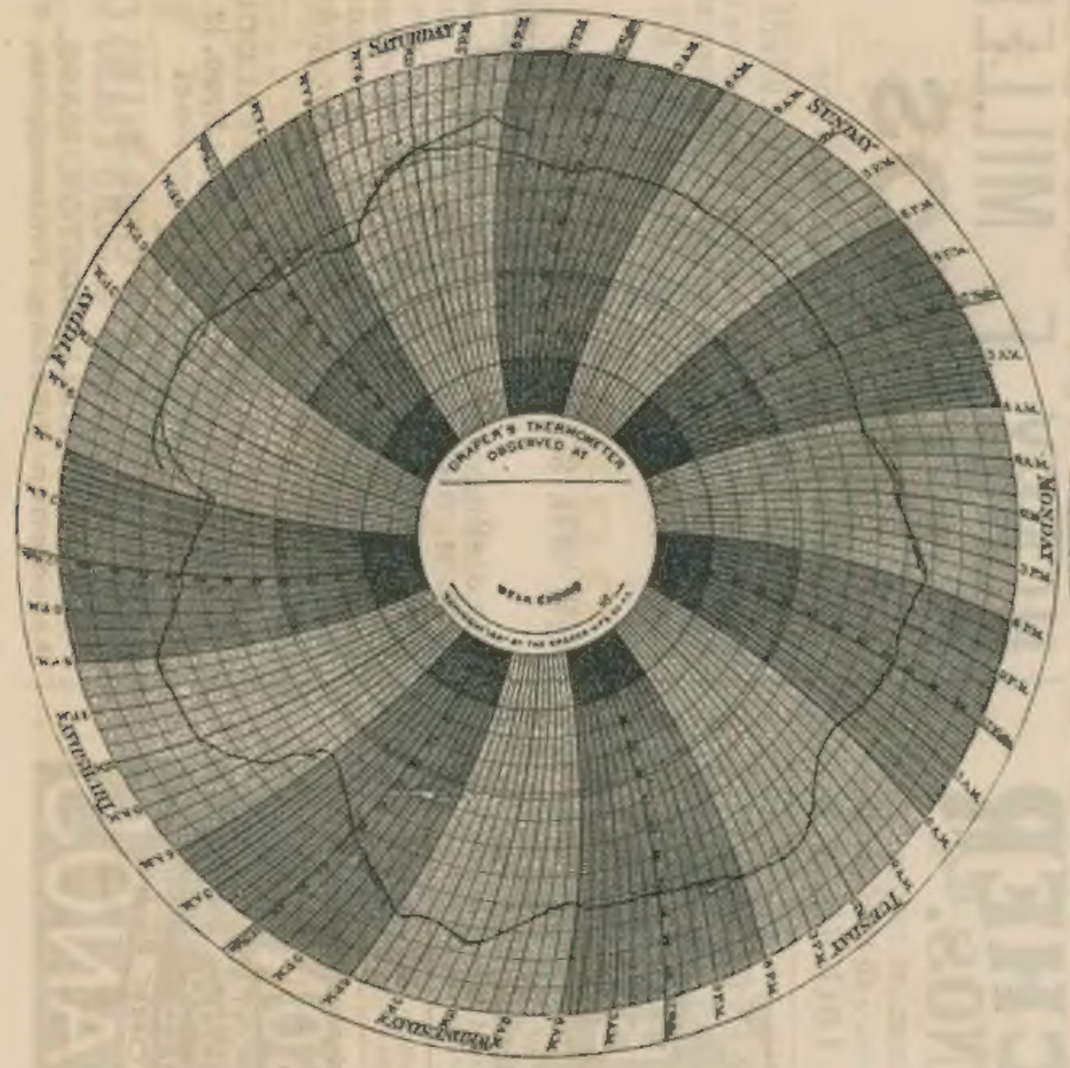

Figure 1.
Before Heat Regulator was applied.

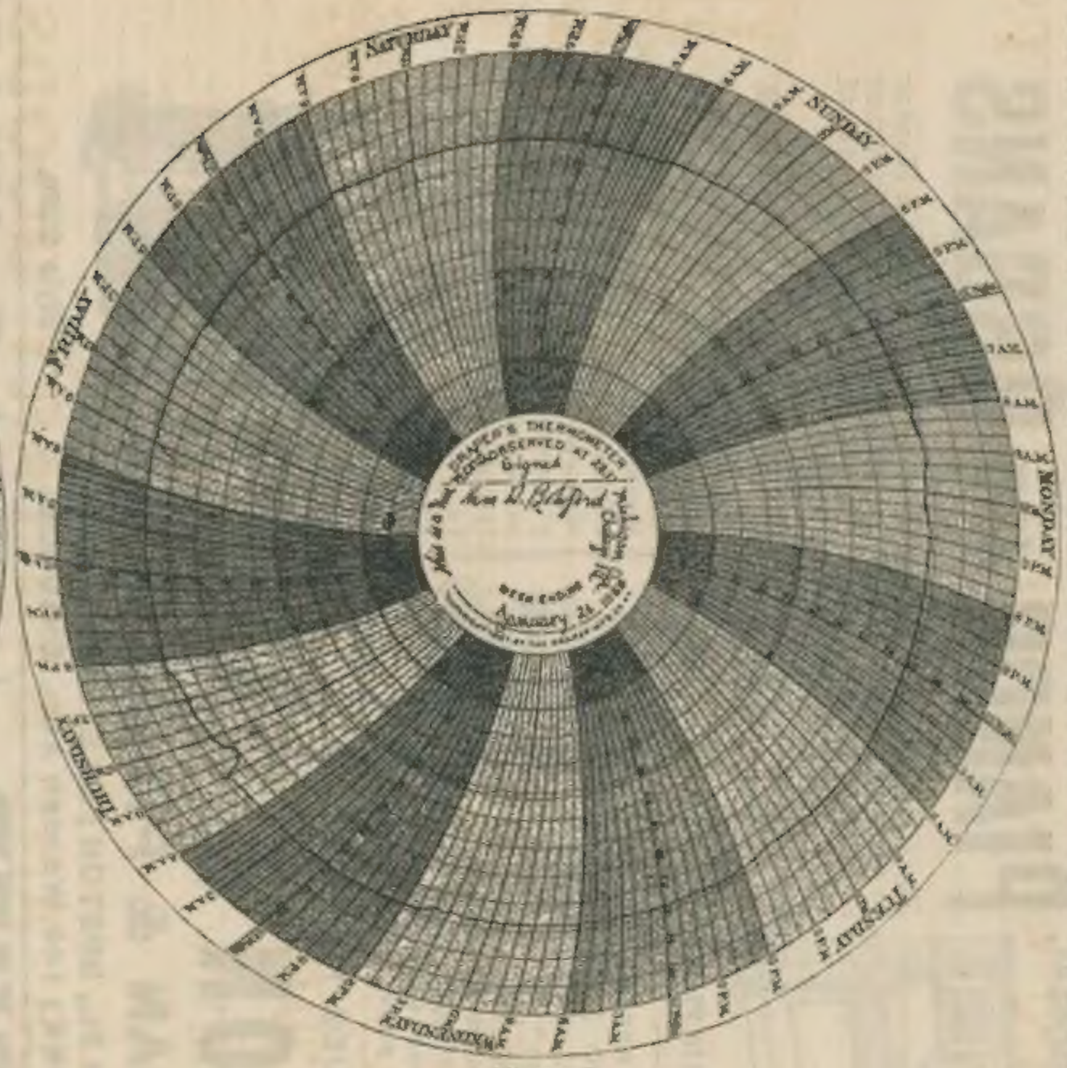

Figure 2.
After Heat Regulator was applied.

The above cuts are taken from photographs of the chart or dial of a Thermograph, or self-recording thermometer, placed in a house on Michigan Avenue, Chicago, by our agent.

In Figure 1, the heavy, irregular line shows the variation of temperature, ranging from 25 to 35 degrees each day, in the house for a week ***before the regulator was applied.***

In Figure 2, the almost perfect circle shows how even the temperature was kept in the house AFTER THE REGULATOR WAS APPLIED. On Thursday morning the doors and windows were opened to air the house, thus causing the sudden fall in temperature.

The regulator can be readily applied to any style of heating apparatus. The thermostat is usually placed in the living-room of the house and set for any desired degree of temperature. If the temperature in the room is below the desired point, then the draft of the heater will be opened and will remain open until the desired degree of heat is reached. If the temperature rises above the desired degree, the regulator instantly closes the draft of the furnace and opens the check damper in the smoke pipe. The regulator saves coal, saves doctors' bills, saves labor. Agents wanted.

For descriptive circular, prices and other information, address **CONSOLIDATED TEMPERATURE CONTROLLING CO. 645 Temple Court, Minneapolis, Minn.**

SMITH (*who has talked incessantly during the performance*). "You are not going to stop, Miss Clarissa?"

MISS CLARISSA. "Oh, no. Only use the Soft Stop so that your conversation may not be interrupted."

OUR PATENT SOFT STOP

IN PIANO PRACTICE so reduces sound that it is not heard outside the room, being just loud enough for the player. Not a soft pedal, but if soft pedal also is used the sound is not heard across the room; not a damper, the tone being vibratory and ringing, though light in volume. Action and feel of keys not changed. Saves nine tenths the wear on hammers, thus preserving the tone from deteriorating in practice, and saving it for playing.

HOWEVER FAR AWAY YOU LIVE we make it as easy to deal with us as in Boston; take your old piano in exchange; adjust terms of payment to reasonable convenience.

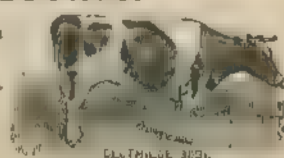
HOLSTEIN-FRIESIAN CATTLE.

Bred for Milk and Butter. *Value Determined by Actual Tests.*

COWS WITH LARGE MILK AND BUTTER RECORDS.



Heifers and Calves, rare in quality, with pedigrees rich in milk and butter, on side of both sire and dam.

A Grand Lot of Butter Bred Bulls, that in quality, or breeding based on production of ancestry, has no equal.

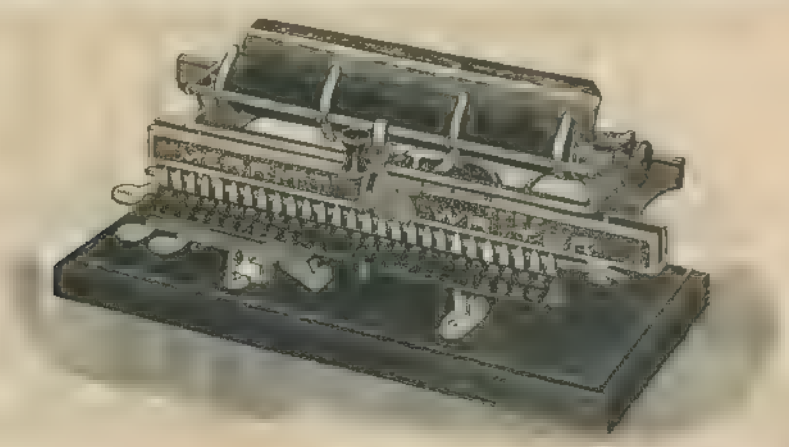
160 Animals from this Herd in Advanced Registry.

Send for catalogue, giving pedigrees and records of this wonderful herd.

In writing, mention THE CENTURY.

SMITHS, POWELL & LAMB, Syracuse, N. Y.

Jan. '90.



THE QUESTION, "IS MARRIAGE A FAILURE," SETTLED AT LAST.

"You see, it works this way," said a plump, rosy-cheeked little wife to a friend of ours the other day. "When I used to sort o' scold Harry in a verbal form for coming home late at night or for not remembering my little commissions and requests during the day, he would grow nervous and irritable and perhaps say something ugly back at me. Then, possibly, I'd retort with more force than I really meant, which only made a bad matter worse. So on reflection, I decided to put all my little 'curtain lectures' on paper. To do this speedily, I procured a MERRITT Typewriter, costing only $15.00 complete. Now I use fewer words than formerly, say exactly what I want to and say it in a cool, dispassionate, pleasant style, enclose it in an envelop and hand it to Harry with a kiss as he is departing for his office. Of course he reads it at his leisure, it serves as a gentle reminder to his memory, and if he wants to scold back, you know I'm not present to hear, and he knows that too. Then he thinks of the kiss I gave him as we parted and he knows I love him, and the result is, all my reasonable requests are granted. No, indeed, marriage is not a failure in our home!"

MORAL—Let all husbands and wives provide themselves with the MERRITT Typewriter and do all their scolding and fault-finding in printed letters addressed to each other and see if married life is not a success. No slips of the unruly tongue then.

SENT TO ANY ADDRESS ON RECEIPT OF $15.00. SEND FOR SPEED TEST AND CIRCULARS.

LYON MANUFACTURING CO.,

HENDERSONS MAMMOTH BUTTERFLY PANSY

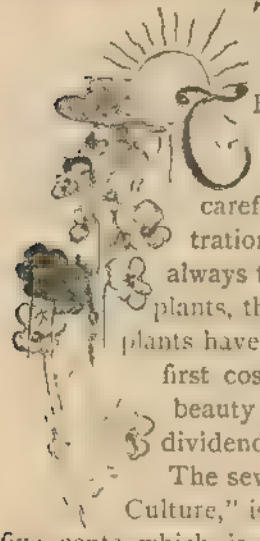
THE MAMMOTH BUTTERFLY PANSY is a selection of the largest flowers and grandest colors of this beautiful strain. Many of the flowers will measure three inches across, and the colors are perfectly dazzling, consisting of BLUE, ORANGE, CARMINE, BLACK, WHITE, BRONZE, CRIMSON, etc., marked and commingled in all conceivable and wonderful ways. So highly do we value this new and exquisite strain that we illustrate them by a grand colored plate in our Catalogue of this year.

Seed mixed all colors, per packet, 40 cents; 3 packets for $1; 7 packets for $2, 12 packets for $3. Free by mail. Plain directions how to raise fine blooming plants from the seeds accompany each packet.

With every order for a single packet or more will be sent, gratis, our superb Catalogue of "EVERYTHING FOR THE GARDEN," (the price of which is 25 cents) on condition that you will say in *what paper you saw this advertisement*. Club orders for THREE, SEVEN or TWELVE packets can have the Catalogue sent, when desired, to the separate address of each member comprising the club.

PETER HENDERSON & CO. CORTLANDT ST. NEW YORK

The Garden of Hardy Flowers.



THE book, "A Few Flowers Worthy of General Culture," is written to show the many advantages of gardening with hardy flowers as compared with bedding plants. We have been very careful not to make a single exaggerated statement, and every illustration is an actual garden picture. It is worthy of note that it is always the garden of hardy flowers, and never the one of bedding plants, that furnishes subjects for the artist's pencil and brush. Hardy plants have all artistic advantages, and all practical ones as well. Their first cost being their only cost and their greatly increasing in size and beauty year after year make an investment in them yield an annual dividend of loveliness not to be computed in any ordinary way.

The seventh edition of our book, "A Few Flowers Worthy of General Culture," is now ready, and will be mailed, postpaid, on receipt of twenty-five cents, which is allowed on the first order for plants. This book is the most beautiful and practical work on gardening published, and should be read by every one interested in the advanced taste in gardening. Our catalogue, containing prices and descriptions of Hardy Plants, Roses, Rhododendrons, Hardy Azaleas, Japanese Maples, Rare Shrubs, Tuberous-rooted Begonias, Gloxinias, Dahlias, etc., is sent with the book.

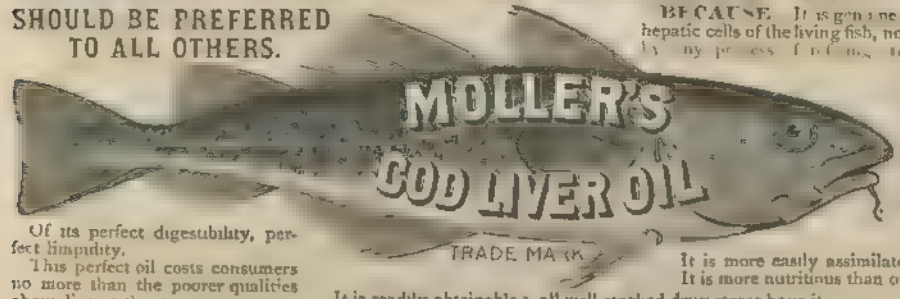
Have proved successful in many cases pronounced incurable. Unseen, comfortable, self-adjusting. Sold only by F. HISCOX, 853 Broadway, cor. 14th Street New-York. Call or write for illustrated book of proofs free

---

REASONS WHY PETER MÖLLER'S COD LIVER OIL

SHOULD BE PREFERRED TO ALL OTHERS.



BECAUSE It is genuine pure, just as it existed in the hepatic cells of the living fish, not depleted of its natural virtues by any process of refining, nor weakened by being made into an emulsion with an equal quantity of water, glycerine, etc., which latter device makes water bring the price of oil.

In taste and smell it is not offensive, but instead sweet and agreeable.

Its administration is always followed by satisfactory results.

It is more easily assimilated than other oils.

It is more nutritious than other oils.

Of its perfect digestibility, perfect limpidity.

This perfect oil costs consumers no more than the poorer qualities abounding in the stores.

It is readily obtainable; all well-stocked drug stores have it.

It is unquestionably the purest and best COD LIVER OIL IN THE WORLD.

W. H. SCHIEFFELIN & CO. New-York, Sole Agents for U. S. and Canada.

THE ONLY NAPHTHA LAUNCH.

OVER **450** IN SUCCESSFUL OPERATION. PRACTICALLY PROVEN THE SIMPLEST and safest motor yet invented. No Engineer, no Government Inspection, no steam, no dust, dirt, smell, smoke, or ashes. EACH,	$3.15	3.40	3.65	3.90

No other fastenings required. Any person can put them on. Requirements for light dwellings, ½ in.; offices, etc., ⅝ in. arm to handle. **When ordering, give Class number, diameter and length.** The length of Transom Lifters is measured from end of arm to handle. To ascertain the size of lifter required, the rule is 4 feet less than the height of the door. The Lift should be placed as near the edge of the finish as possible.

Length, feet,	4	5	6
EACH,	$1.15	1.30	1.45

Nos., (Order by these Numbers.)	245	246	247
Diameter, inches,	1 1/4	1 1/4	1 1/4
Length, feet,	5	6	7
EACH,	$1.55	1.75	1.95

For Transoms hung at the Top, Bottom or Centers, to push up or pull down, on either Right or Left Side of Door. As shown by the Cut, the Shield Lifter has a Safety Spring, which acts as a cushion, receives the shock, and prevents the glass from being broken, should the Transom be allowed to fall suddenly through carelessness. This is especially needful for Transoms hinged at the bottom.

One Hundred in a Case.

The length of Transom Lifters is measured from end of arm to handle. To ascertain the size of Lifter required for a door, the rule is 4 feet less than the height of the door.

For Illustrations showing mode of attachment, see Page 1878.

EACH.

1-8 in., Barnes' New Former Knives, ... $0.50
3-16 in., Barnes' New Former Knives, ... 50
1-4 in., Barnes' New Former Knives, ...50

We show on page 381 cuts of Mouldings made by our New Pattern Knives. These embrace forms not covered by our old set of Knives, Nos. 1 to 20. The New Knives are made on a different principle from the old ones, and can be used separately or in combination. The illustrations given do not by any means show the full extent of the work that can be done with these Knives. The possibilities of combinations are almost endless, and valuable as the Former has been heretofore, its usefulness is immensely increased by this new set of Knives, which make the Former the most valuable single machine that a Cabinet Maker or wood worker can employ.

The above cut represents the elementary forms of the Knives, which as before stated, can be used singly or in combination, as may be required. All the different shapes are made in three sizes, viz: $\frac{1}{4}$ in., $\frac{3}{8}$ in., $\frac{1}{2}$ in., and it is designed that where Knives are used in combination, they shall all be of the same size. This, however, is not imperative, and the users of the Knives can combine different sizes, according to their fancy.

In ordering these Knives, it will be well for customers to give the shape of Knives required, designating same by letters as shown on cut, and also state size, whether $\frac{1}{4}$, $\frac{3}{8}$ or $\frac{1}{2}$, as the case may be.

Where Knives are wanted for making any of the forms shown on Page 381, it can be so stated in the order, and to facilitate the ordering of such Knives, we give below Knives required to make the different forms:

Form No.	takes	Knives	K G-D-G-K

" 62	"	"	G-D G

These New Knives supersede the old style Beading Knives, to which they are greatly superior in many ways. They require no head for holding them, as was the case with the old Knives; they are reversible, whereas the old Beading Knives could be run in one direction only, and they have the great advantage of being used singly for center bead work or in combination for any number of beads that may be desired.

Description of Safes.

Fire Proof Walls, are filled with best known non-conducting concrete. Its fire proof quality consists in the chemical change which occurs upon the concrete being heated to a certain high temperature. A vapor is generated which fills all the pores in the concrete, forming a cool, moist wall entirely around the contents.

Body of Safes. One continuous **Wrought Iron Plate** forms the top, sides and bottom, and is securely riveted to heavy front and back crescent angle frames, solidly riveted at all corners.

Doors have four flanges, front and back bolts with independent handle for operating the bolt work, and removable inside cap to allow access to change combination.

Locks are three tumbler, non-pickable combination locks, set to three numbers, so that by operating the dial knob in a certain way in connection with the three numbers, the safe may be opened. Every purchaser can set his lock to numbers of his own selection, so no one but himself will know the combination.

Exterior. The whole body of the safe is finished in **Black,** and decorated in **Gold.**

Interior. Cabinet is furnished in poplar wood, provided with cash drawer, pigeon-holes, and iron sub-treasury box with two flat steel keys. Bottom is handsomely carpeted. Inside doors are not only convenient, but furnish additional security.

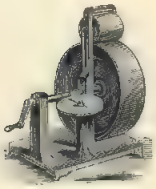
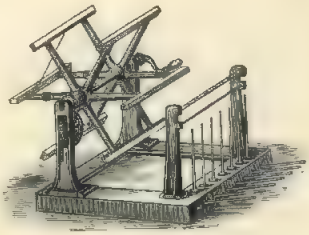
REELS.



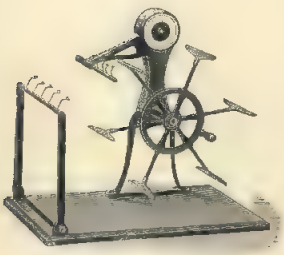
$14 00.

For reeling small quantities of Roving, Drawing and Yarn, *and also to determine the number of twist in yarn.*



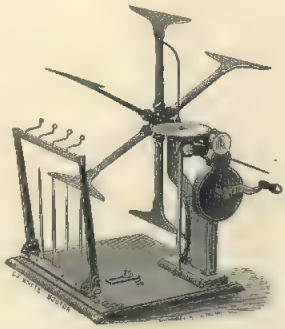
$18 00.

The yarn can be taken from either bobbins or cops. The circumference of the Reel is fifty-four inches, and as the yarn is wound from seven spindles, eighty revolutions make a skein, which is indicated by a snap on the side of the worm wheel attached. Also arranged for reeling woolen yarn.



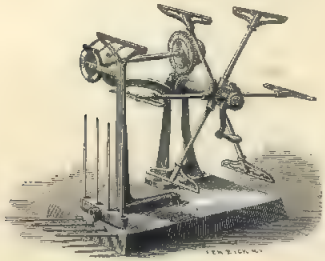
FOR WOOLEN AND WORSTED YARNS.

36 inch Reel, ... $15 00



54 inch, with hinged fin, geared 4 to 1, ... $30 00
54 inch, with hinged fin, not geared up for speed, ... $25 00
54 inch, geared 4 to 1, without hinged fin, ... $25 00
54 inch, not geared and without hinged fin, ... $22 50

IMPROVED YARN REEL.



$25 00

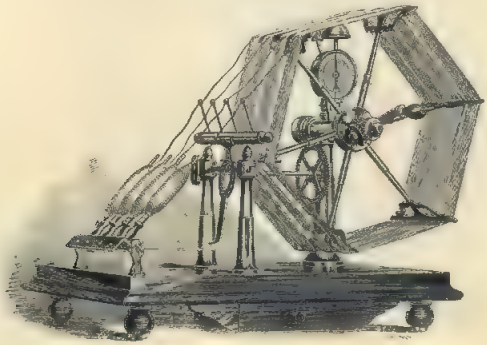
This Improved Yarn Reel is especially adapted for accurate reeling of fine yarns.

The Reel is 54 inches, or one and a half yards in circumference. The dial is graduated into 120 parts, indicating the number of yards reeled from each spindle. The yarn guides and spindles are kept in line with each other while feeding yarn upon the reel, which is very desirable when reeling fine yarns The extra length of yarn guides is of use in increasing the friction upon the yarn by taking a half-turn or more of yarn around them. The *automatic feed motion* lays the yarn flat upon the reel, thus securing accurate and uniform measurement, and consequently correct results as to stretch, strength, and numbering.

See our printed tables for use in connection with this reel, for numbering cotton, linen, woolen, and worsted yarns.

The bright spot on the web of the worm wheel is to show when the zero upon the dial approaches the index point, and thus assists the operator to stop promptly on the striking of the bell. Four or seven spindles.

ENGLISH YARN REEL.

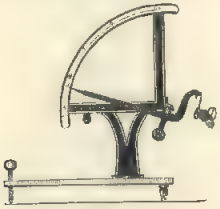


54 inch, ... $50 00

On mahogany stand, with self-acting spreading motion for both cops and bobbins; bronze guide motion; turned and polished iron pillars and shafts; polished and laquered bronze arms and wheels; bell to strike and dial to record every 120 yards or 80 threads.

YARN ASSORTER

FOR COTTON OR WOOL.



$3 00.

They commence at Nos. 2 and 10, and are graduated from 2 to 60 for coarse, and from 10 to 100 for fine yarn. Please state which is wanted.

ROVING OR YARN SCALES.

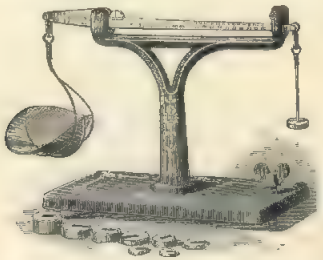
$5 00.

A table showing the weight of all numbers of yarn in troy grains, a description of the instrument and the uses to which it can be applied, is furnished with each. Also see rules and tables in this book.

$8 00.

IMPROVED ROVING OR YARN SCALE.

FOR ACCURATE WEIGHING



$10 00.

Will weigh one pound by tenths of troy grains, or one seventy-thousandth part of one pound avoirdupois, rendering it especially well adapted for use in connection with Yarn Reels, for the numbering of yarn from the weight of hank, giving the weight in tenths of grains to compare with tables. It is also useful for the weighing of any small articles, colors, drugs, etc., for computation of large quantities, or for a postal scale. The finished parts are nickel plated, and the stand japanned and ornamented. Ten balancing weights accompany each scale, viz: One each of 20, 30, 50, 100, 200, 300, 500, 1000, 2000 and 3000 grains; the 20 grains on the beam being each divided into 10 parts.

One pound avoirdupois = 7000 troy grains.
½ " " = 3500 "
¼ " " = 1750 "
⅛ pound avoirdupois = 875 troy grains.
One ounce " = 437·5 "

ORME'S INDICATOR.

Fig. 1.

No. 6a.

FOR

ROVING, DRAWING,

RING FRAMES,

&c

$6 25.

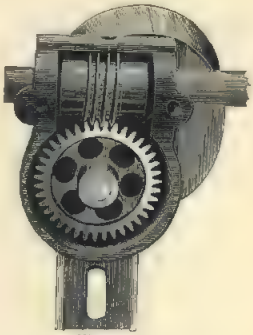


Fig. 2.

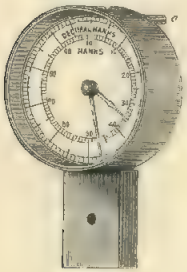
This Indicator is the same in principle as the No. 6. It is made entirely of brass, copper enameled face, glass front, and brass cover over that; it is an ornament in a frame as well as giving accurate results easy to be read. The improvement consists in enclosing the driving worm and wheel in a case to protect them from the cotton fly, as all Indicators with ordinary guards, as shown on No. 6, are liable to get the fly between the wheel and the inside of guard, thus causing friction on the wheel, and wearing it away. Fig. 1 is a front view of the Indicator; like the No. 6 it indicates hanks and decimal part of hanks, and registers up to 100 hanks. Fig. 2 is a back view, with the cover removed to show the method of guarding the driving wheel and worm. This Indicator is fixed at the out end of the frame, and is driven by a short ¾-shaft, fastened in the end of the front roller; this shaft carries the driving worm for working the Indicator as illustrated. The advantages of having the Indicator fixed in this position are, that it is easy to see, and also it is not liable to be damaged, being away from the driving mechanism. *It cannot be tampered with.*

When ordering, state the diameter of front roller, and if Bracket is required give the distance from centre of roller to roller beam. Bracket when supplied is charged 50 cts. extra.

Also make Indicators for giving Hanks or recording stretches on mules; Indicators to go on tappet shaft of Looms to record picks; also to go on line shafts to record revolutions, &c., to 2,000,000 picks or 1,000,000 revolutions.



ROVING OR YARN METERS.

BROWN & SHARPE.

$6 00.

These instruments are intended to indicate the quantity of of Yarn each spindle has been making in hanks and decimal parts. They are attached to the front side of one end of the head rail of a slubber, fly-frame, spinning-frame or mule. A worm is attached to the end of the front roll, which gears into a wheel on the shaft *a*. A wheel of 77 teeth is suitable for a front roll, 1¼ inch diameter; 86 teeth for 1⅛ inch roll; 96 teeth for 1 inch roll.

MANCHESTER CLOCK OR METER

In ordering, give Size of Front Roll. $5 00.

HILL'S CLOCK OR METER.

Complete with Gear Wheels, $6 50.

Cut shows how Stoves are used with Range Frames.

No. 300—Range Frame for Three Oil Stoves, 12 in. Wide, 36 in. Long, 24 in. High, Weight 30 lbs., ... EACH. $6.50

The No. 300 for shipment occupies a space about 12 x 12 x 8 inches, and the No. 200 a little less. These Ranges are made in sections, about 12 inches square, so that if one part gets broken it can easily be replaced. The Stoves can readily be removed for cleaning or care. They are finished in Japan and Gold Mottle, the top grates are nickeled, with polished edges. American Oil Stoves, No. 14, page 744; No. 25, page 745; and No. 38, page 746, fit these Ranges.

One in a Crate.

Barrett's.

Barrett's, Swivel Base, Adjustable Jaw,	Nos.,	10	20	40	60
	Width of Jaw, inches,	3	3½	4½	5½
	Weight, lbs.,	30	48	75	115
	Opens, inches.	4	5	7	8½
	Each,	$7.75	8.50	12.50	19.00

The leading feature of this Vise is the Adjustable Jaw, by which tapering work of almost any angle can be gripped as firmly as straight work. The body of the Vise is bored and fitted with a flange nut which is free to revolve in same, the front jaw passes over this flange nut, consequently it is the front jaw that is adjustable to the tapering work, leaving the back jaw solid and rigid, capable of carrying the heaviest class of work, and resisting the severest shock of chipping This construction also gives to the operator perfect control of the swinging of the jaw while he is tightening upon the work

The jaws are faced with the best tool cast steel, welded on, file cut, properly hardened.

The heads of the screws are forged and set up close to the bar of the Vise. All parts of the Vise are interchangeable.

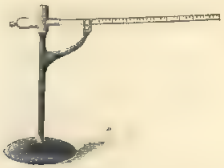
YARN BEAMS.

NO. 1.

For numbering yarns, graduated for either cotton or wool.

$4 50

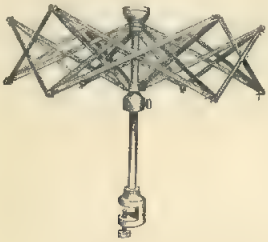


NO. 2.

These beams are made for any given number of yards at a test, and for either cotton, woolen, worsted, linen or silk threads, yarns or roving.

State whether for cotton, woolen or worsted yarn; the number of yards you use at a test, and the standard — *i. e.*, runs or cuts, etc. $5 00.

REEL.



To reel off small quantities of yarn.

$1 75.

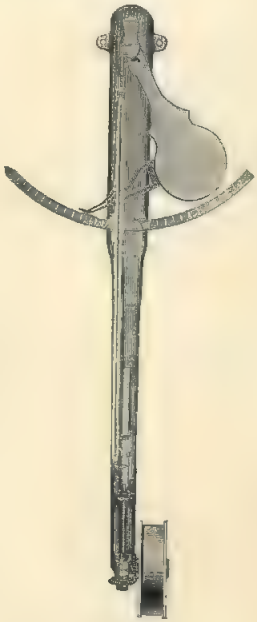
TWIST COUNTER.

Very convenient and accurate for determining the twist in yarn. Adapted for lengths of from one to ten inches, and for either right or left hand twist.

$10 00

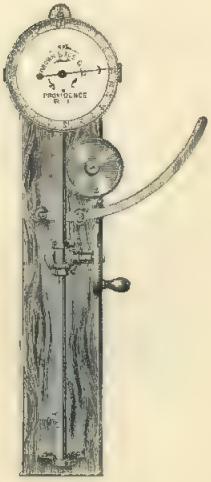
YARN AND TWINE TESTERS.

Hand, $40 00.



Power, $50 00.
Hand, $30 00.

YARN TESTER.



THE STANDARD ENGLISH YARN TESTER.

Is designed to ascertain the stretch and strength of Yarns and Twines, and for this purpose IS UNEQUALLED.

It is highly endorsed by the leading manufacturers of the World.

To test to 100 pounds, ...	$ 55 00
" " 150 "	85 00
" " 200 "	150 00

SEE TABLE TO ASCERTAIN QUALITY OF YARNS, &C.

SINGLE THREAD TESTERS.

To 80 lbs. by 1 lb., $5 00

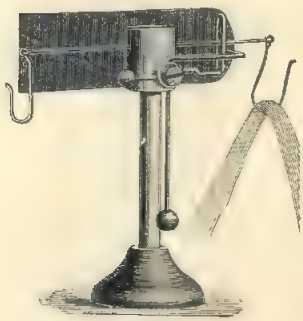
SILK TESTERS.

To 15 lbs. by ¼ lb., $3 00
To 30 lbs. by ½ lb., 3 00

EUREKA SILK TESTERS.

To 15 lbs., $7 50

YARN BALANCE.



STAUB

Price in case, $15 00.

For indicating the counts of *Yarn in small pieces of cloth.*

Cut the cloth of which it is desirable to know the No. of yarn to the size of the respective templet, then withdraw a certain number of threads of either the warp or the weft from the bit of cloth, hang them on the hook (separately) and when the scale balances, the number of threads then represents the exact number or counts of the yarn.

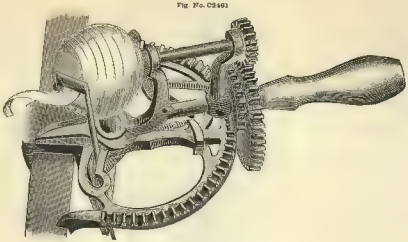
The following templets are enclosed with each apparatus:

Templet 1, for goods of cotton yarn.
" 2, for goods of worsted and woollen yarn.
" 3, for goods of linen yarn.

Templets for French (metre) counts, silk, etc., can be supplied, if desired, at a small extra cost.

APPLE PARERS.

Fig No. C2491



New Lightning.

PER DOZEN.

New Lightning, ... $9.50

One forward movement of the handle is all that is required to pare an apple from the stem to the blossom, while a return of the handle pushes the apple off the fork. It will pare rough and irregular shaped apples better than any machine made.

One Dozen in a Box. Weight Per Dozen 47 lbs.

Cut Showing with Case.

Wadleigh's Patent Carpenters' and Lumbermen's.

PER DOZEN.

Wadleigh's, **Carpenters'** Board Measure, Brass Case, Best Corded Linen Tape, 50 ft. in Length, 5/8 in. Wide, $30.00

Wadleigh's, **Lumbermen's** Combination Lineal and Board Measure, Brass Case, Best Corded Linen Tape, 50 ft. in Length, 5/8 in. Wide, . . . 30.00

Wadleigh's, Lumbermen's Tape, **without Case,** . 18.00

One in a Box.

The Lumbermen's Tape possesses all the advantages of the ordinary tape line, having the feet and inches on it, and in addition has the board rule printed on the outire length of the line, thereby reducing the measuring of lumber to a purely mechanical and infallibly accurate process. The cases are so constructed that new tapes can be inserted when the old ones are worn out.

EACH.

No. 110—With Shaved Spoke Wood Wheels, ... $24.00
Tinned Wire Wheels, no Extra Charge.
Tinned Wire Wheels, **with Rubber Tires,** . . . . . EXTRA, 4.00

The Body is made of Wound Rattan, and is Varnished. It is Upholstered in Spun Silk in combination with a Plush Roll at the top. The Parasol is Satin, with a Lace edge. It is mounted on the Patent Scroll Springs.

FIG. NO. C6187

EACH.

No. 105—With Shaved Spoke Wood Wheels, ... $26.50
Tinned Wire Wheels, no Extra Charge.
Tinned Wire Wheels, **with Rubber Tires,** . . . . . EXTRA, 4.00

Made with Fine Wound Rattan Body, Varnished. It is Upholstered with Turkish Satin, and has a Satin Parasol, with Spanish Lace edge. It has handsome Wheel Guards. The Springs are Patent Scroll Springs, the best in use.

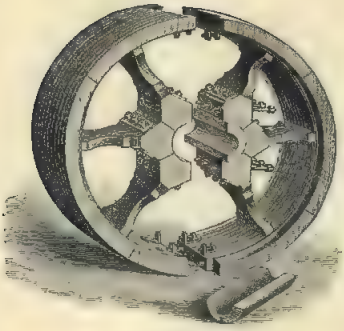
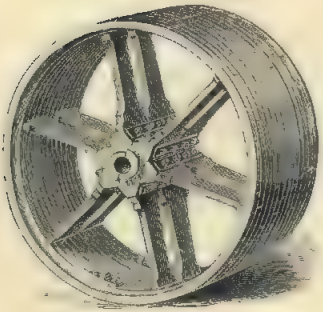
PULLEYS.

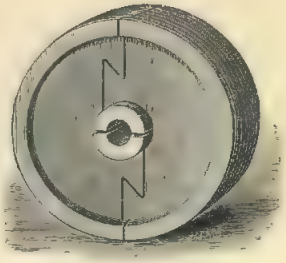


"GILBERT UNIVERSAL"
WOOD SPLIT PULLEY.

"GILBERT INTER-LOCKING"
WOOD SPLIT PULLEY.



"GILBERT UNIVERSAL."
All sizes from 12 to 120 inches in diameter.



"GILBERT INTER-LOCKING"
Made only in sizes from 6 to 20 in. in diameter

See next five pages.

IN STOCK READY FOR IMMEDIATE SHIPMENT.

HOW TO ORDER PULLEYS.

1st.—Give diameter of pulley. 2d.—Give width of face. 3d.—Give exact size of shaft. 4th.—Give crown or flat face.

SIZE OF SHAFT FOR SPOKE PULLEYS

Pulleys 12 to 14 inches in diameter are bored for a bushing 3⅜ inches outside diameter, and will go on a shaft 2½ inches in diameter, or less.

Pulleys 15 to 20 inches in diameter are bored for a bushing 3⅝ inches outside diameter, and will go on a shaft 3 inches diameter, or less.

Pulleys 21 to 48 inches in diameter are bored for a bushing 4⅜ inches outside diameter, and will go on a shaft 3½ inches diameter, or less.

Pulleys 49 inches and larger diameters are bored for a bushing 4⅝ inches outside diameter, and will go on a shaft 4 inches diameter, or less.

Pulleys made to order to fit any size shaft without extra charge.

SIZE OF SHAFT FOR INTER-LOCKING PULLEYS.

Interlocking Pulleys 6 and 7 inches in diameter are bored for a bushing 3 inches diameter at the small end, and will go on a shaft from 1 inch to 2½ inches diameter, but not larger.

Pulleys 8 to 20 inches diameter are bored for a bushing 3¾ inches diameter at the small end, and will go on a shaft from 1 inch to 3¼ inches diameter, but not larger.

FLANGE PULLEYS

Made with either one, two, or more Flanges, as desired.

For price of one Flange add 15 per cent. to list of prices. Two Flanges add 20 per cent., and for each additional flange after two add an extra 5 per cent. to regular list of prices and discount same as regular pulleys.

LOOSE PULLEYS

For Loose Pulleys we can furnish pulleys bored to fit shaft, running on end-grain wood of spokes, and making a nice, smooth running pulley, for which there is no extra charge.

IRON CENTRES

We are prepared to make pulleys any size, diameter and width of face with iron centre to compress on shaft over a key, so as to transmit any required power. Being a wood rim will stand higher speed than any iron pulley made.

RULE TO DETERMINE SIZE OF PULLEY NEEDED WHEN YOU WANT TO CHANGE SPEED OF SHAFT.

Let B represent a shaft with 24 inch pulley, making 100 revolutions per minute. We wish to ascertain size of pulley to go on counter-shaft to bring speed of counter-shaft down to 65 revolutions per minute.

Multiply the diameter of pulley by revolutions of shaft B, and divide product by the number of revolutions you wish counter-shaft to make. The result is size of pulley required.

Example.—

24×100=

65) 2400 (37 size of pulley needed.

Steel, Circular.

	EACH
No. 113—Adjustable, 1⅞ in. Cutter,	$4.00

Has a Flexible Steel Face, which can be easily shaped to any required arch, either concave or convex, by turning the knob on the front of the Plane. The Knob is attached to a double-acting screw, which moves two levers properly connected by gears, thus controlling accurately both ends of the Flexible Face. By the peculiar construction of the Plane, a smaller arch, either concave or convex, can be obtained by this Plane than by any other similar tool.

Router.

	EACH.
No. 71—Woodworkers', Iron Stock, with Steel Bits (¼ and ⅜ in.), ...	$1.50

When in the form shown in the Illustration, No. 71 Router Plane is perfectly adapted to smooth the bottom of grooves, panels, or ALL DEPRESSIONS BELOW THE GENERAL SURFACE of any woodwork.

The Bits can also be clamped to the back side of the Upright Post and outside of the Stock. In this position they will plane into corners, or will smooth surfaces not easily reached with any other tool, as the form of the Shank enables the Bit to work either parallel with the Stock lengthwise, or at a right angle with it.

Chamfer.

EACH.

No. 72½ Iron Stock, 9 inches in Length, 1⅝ in. Cutter, with Beading and Moulding Attachment, $3.00

The front section of No. 72 Plane, to which the Cutter is attached, is movable up and down. It can be firmly secured to the rear section of the Plane at any desired point by means of a thumb screw. Without the use of any other tool this Plane will do perfect chamfer or stop-chamfer work of all ordinary widths.

When the two sections are clamped together so as to form an even base-line, the tool can be used as an ordinary bench plane.

Tonguing and Grooving.

EACH.

No. 48—Iron Stock and Fence, for ⅜ to 1½ in. Boards, $2.50

No. 49—Iron Stock and Fence, for ⅜ to ¾ in. Boards, 2.50

Nos. 180 and 190 will be perfectly flat on either side, and can be used with right or left hand equally well, while planing into corners or up against perpendicular surfaces.

The stock of No 48 is made of metal, and has two Cutters fastened into the stock by thumb screws. The Guide, or Fence, when set as shown in the above engraving, allows both of the Cutters to act; and the Cutters being placed at a suitable distance apart, a perfect Tonguing Plane is made. The Guide, or Fence, which is hung on a pivot at its center, may be easily swung around, end for end; thus, one of the Cutters will be covered, and the Guide held in a new position, thereby converting the Tool into a Grooving Plane. A groove will be cut to exactly match the tongue which is made by the other adjustment of the Tool.

EACH.

No. 50—Adjustable, Iron Stock and Fence, including Bits, 1/8, 3/16, 1/4, 5/16, 3/8, 7/16 and ½ in., $4.00

No. 78 Remove the arm to which the fence is secured, and a Handled Rabbet Plane is had, and with two seats for the cutter, so that the tool can be used as a But. Nose Rabbet if required. The construction of the stock is such that the Plane will lie perfectly flat on either side, and can be used with right or left hand equally well while planing into corners or up against perpendicular surfaces. The arm to which the fence is secured can be screwed into either side of the stock, thus making a superior Right or left hand Filletster, with adjustable spur and depth gauge.

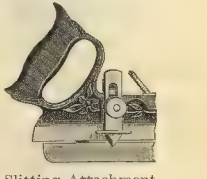
No. 43—Iron Stock and Fence, ...	$7 00

Fig. C431 shows No. 43 Plane, representing the Tool adjusted for use as a Plow. With each Plow 8 Bits ($\frac{1}{8}$, $\frac{3}{16}$, $\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, $\frac{7}{16}$, $\frac{1}{2}$ and $\frac{5}{8}$ in.) are furnished; also, a Tonguing Tool ($\frac{1}{4}$ in.), and by use of the latter, together with the $\frac{1}{4}$ in. Plow Bit for grooving, a perfect Matching Plane is made.

Fig. No. C432.



Slitting Attachment.

With Planes Nos. 41, 43 and 46.

Fig. No. C432 shows Slitting Gauge with Planes Nos. 41, 43 and 46. The improvement is an important one, as carpenters who have not the convenient use of Circular Saws, can with this Slitting Tool rapidly slit up their stuff for fitting up doors and windows, or kindred work.

One in a Box. Printed Instructions with each Plane.

BASKETS.

Our experience (of twenty years) warrants us in saying that the BRUNONIAN is the very BEST Basket made. The stock is carefully selected from young growth of WHITE ASH and is pounded out, not cut, (as is the case with most basket stock). They are bound with the best of oak rims securely fastened with steel nails clinched. Instead of heavy board bottoms, we use light frame runners; this gives the basket suitable protection on the bottom with much less weight; these runners or shoes are securely RIVETED, not simply nailed or screwed on. We do not bind them with hoop iron; it adds weight, and has not the same elasticity as good basket stock.

For extra large baskets and heavy work we recommend the EXTRA STRONG. See page 231.

TACKLE BLOCKS.

Sure Grip Steel Tackle Blocks.

Fig. No. C9490.

		Each.
No. 3	—To be used with ⅜ in. Rope, one man can easily lift 250 lbs., Capacity 450 lbs.,	$3.00
No. 4	—To be used with ½ in. Rope, one man can easily lift 350 lbs., Capacity 760 lbs.,	5.50
No. 5	—To be used with ⅝ in. Rope, one man can easily lift 350 lbs., Capacity 1500 lbs.,	7.00
No. 6	—To be used with ¾ in. Rope, one man can easily lift 400 lbs., Capacity 2000 lbs.,	8.50
No. 6½	—To be used with ¾ in. Rope, one man can easily lift 600 lbs., Capacity 3000 lbs.,	14.00

Will hold load at any point without backward slip, thus enabling a man to hoist with half the usual amount of exertion. The wedge-shaped brake has a double grip, and is absolutely automatic and very positive. Its efficiency increases in direct proportion to increase of load, at same time it is susceptible of being disengaged by very slight pressure. Continuous use has shown this block to be very economical in wearing rope. This derrick is very desirable when it is of advantage to hold a load suspended for a time. It is quick lifting, and quick lowering, and light.

The Rope is not included in the above prices. When ordering, if we are to furnish the Rope, give the exact distance between the lowest starting point and the Hook the Machine is suspended from.

Fig. No. C9491.

Instructions for Reeving.

Enter rope at A, pass wedge, and follow arrows as shown in cut. It will be noticed that the two center ropes coming in contact with wedge always travel in same direction at same time.

Fig. No. C9492

Sure Grip Steel Tackle Blocks.

The only Portable Hoisting Machine made that is at all suitable for Store Hatchways.

Lane's Patent Self-Sustaining Tackle Blocks.

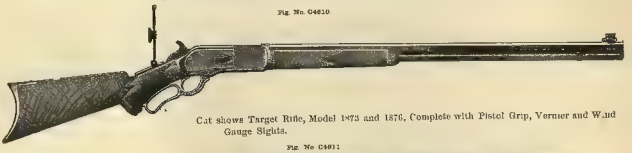
Weight, Round Barrel 9 lbs., Octagon Barrel 9¼ lbs.

Special Target Rifle, Model 1873 and 1876.

Fig. No. C4610



Cut shows Target Rifle, Model 1873 and 1876, Complete with Pistol Grip, Vernier and Wind Gauge Sights.

Fig. No. C4611

Fancy Sporting Rifle, Model 1886.

We can furnish to Special Order any of the Standard Winchester Repeating Rifles, by **adding the following:**

EXTRAS.

All deviations from standard styles and sizes involve a large proportional outlay for hand labor, and, when ordered, will be subject to the following charges.

For additional length of barrel and magazine on Repeating Rifles, add to price $1.00 per inch over the regular lengths, as quoted in preceding pages.

Barrels cannot be furnished longer than 36 inches.

Extra heavy barrels on Repeating Rifles, Round or Octagon, increasing the weight of the gun from one to two pounds, can be furnished at an additional cost of $4.00.

Butt Stocks of special shape, involving change in either length or drop from standard, $10.00.

Engraving, from $5.00 to $100.00 additional, according to style and quality.

Full Nickel Plating,	$ 4.00	Rubber Butt Plates,	$2.00
Nickel Plating Trimmings,	2.50	Swiss Butt Plates,	2.00
Silver Plating Trimmings,	4.00	Cheek Piece on Fancy Stock,	4.00

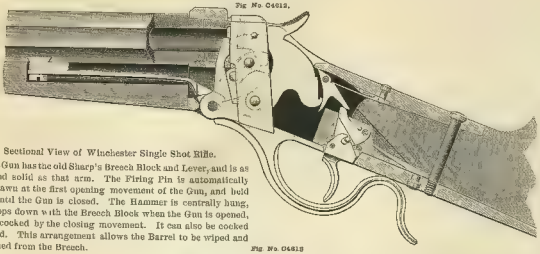
Fig No. C4612.



Sectional View of Winchester Single Shot Rifle.

This Gun has the old Sharp's Breech Block and Lever, and is as safe and solid as that arm. The Firing Pin is automatically withdrawn at the first opening movement of the Gun, and held back until the Gun is closed. The Hammer is centrally hung, but drops down with the Breech Block when the Gun is opened, and is cocked by the closing movement. It can also be cocked by hand. This arrangement allows the Barrel to be wiped and examined from the Breech.

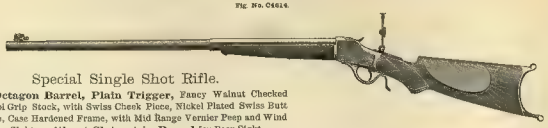
WINCHESTER SINGLE SHOT RIFLES.

Fig. No. C4614.



Special Single Shot Rifle.

Half Octagon Barrel, Plain Trigger, Fancy Walnut Checked Pistol Grip Stock, with Swiss Cheek Piece, Nickel Plated Swiss Butt Plate, Case Hardened Frame, with Mid Range Vernier Peep and Wind Gauge Sights, **without Slot cut in Barrel** for Rear Sight.

Fig. No. C4615

Special Sporting Rifle.

Octagon Barrel, Plain Trigger, Fancy Walnut Checked Pistol Grip Rifle or Shot Gun Butt Stock.

We can furnish to special order any of the Winchester Single Shot Rifles on page 1118, same style and finish as the above Special Rifles, **by adding Extras on Page 1117.**

No. 4 barrel is made to accommodate those wanting a heavier gun, and will weigh from 10½ to 11 lbs. For this weight **an additional charge of $2.00** will be made over the regular price.

No. 5 barrel is the heaviest which can be made, and will weigh about 12 lbs. For this weight **an additional charge of $10.00** will be made over the regular price.

For lengths over those given above, **$1.00 extra for every 2 inches.**

No barrels can be made over 36 inches in length.

Jointed rod in butt stock, **50 cents extra.**

When **special barrel without slot** for rear sight is wanted, **an additional charge of $2.00** will be made, and no allowance for rear sight. The same charge will be made for changing the position of rear sight.

All other Extras same as list on Page 1117.

All .22 Caliber Single Shot Rifles will be accompanied by a brass cleaning rod, other calibers by a slotted hickory rod without charge.

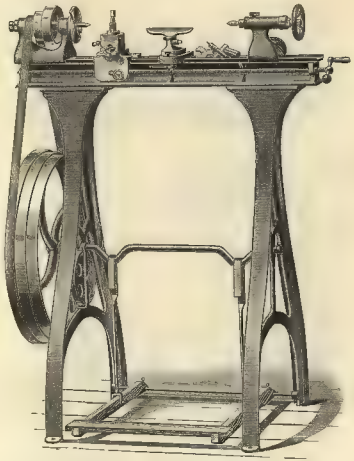
LATHES.

Fig No C1688



Barnes', New No. 4F, with Foot Treadle. EACH.

No. 4F- Including 1 Turned Face Plate, 2 Pointed and 1 Spur Centers, 2 Rests, with Sockets and Plate for Hand Tools, Slide Rest or Tool Carriage as described, and Wrench and necessary Belting, ... $40.00

The leading screw for the tool carriage is operated by hand; by it the tool carriage can be traveled 20 inches, the entire distance between the centers. The carriage can be engaged or disengaged instantly from the leading screw. The upper or cross slide ways on which the tool post moves can be set at any desired angle, and tapers can be turned and taper holes bored to the extent of its travel on these ways. The arrangement of the tool post and carriage is such that balls can be turned.

The speed can be varied from 1,000 to 2,000 revolutions per minute

The tail stock can be moved and set at any point desired, by the simple turning of a hand-wheel, or it can be taken off entirely, thus leaving the bed free for face plate or chuck work. The head stock spindle has taper bearings, and can be adjusted with as much delicacy as a jeweler's lathe; that of the tail stock is moved by a screw and hand wheel. The head and tail stock spindles are made of steel, and have truly fitted taper centers, and that of the tail stock is self-discharging.

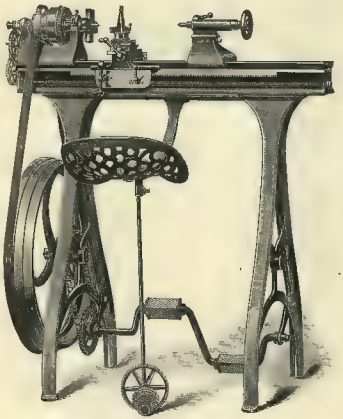
It will take in work 7 inches in diameter and 20 inches long.

Weight, 180 lbs.

When it is possible to do so, Chucks should be Fitted to Lathes before being Shipped.

LATHES.

Fig. No. 01698.



Barnes', New No. 4½, Velocipede

	EACH.
No. 4 1-2 —Velocipede, 25 in. between Centers, Weight, 255 lbs.,	$70.00
No. 4 1-2A—With **Countershaft, no Foot Power,**	75.00
No. 4 1-2B—With both **Foot Power and Countershaft,**	85.00

Is a back-geared screw-cutting Lathe. It feeds right or left, and cuts screws right or left without change of gearing. The carriage is adjustable for taper boring or ball turning. It is thoroughly gibbed for taking up wear.

The tail stock has side movement to adjust centers for turning tapers. The head stock has hollow spindle for rods up to ⅝ in. All the gearing is cut from solid metal. All parts are made of Steel where this would best serve the purpose.

It will cut all ordinary threads from 5 to 48, and miscellaneous threads up to 154. It swings 9 in. on face plate and 4¾ in. over tool carriage.

The small Pulley on cone is 2½ in.; the large Pulley 4½ in. It has three speeds and is suitably arranged for heavy or light work in turning or polishing.

When it is possible to do so, Chucks should be Fitted to Lathes before being Shipped.

LATHES.

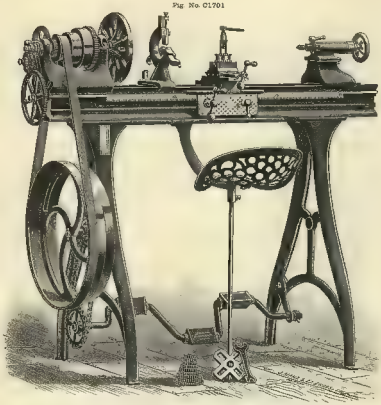
SIMMONS HARDWARE COMPANY

LATHES.

Fig No. C1701



Barnes', New No. 5, Velocipede.

	EACH.
No. 5 —Velocipede, 34 in. between Centers, Weight, 365 lbs.,	$100.00
No. 5A—Velocipede, 40 in. between Centers, Weight, 400 lbs.,	112.00
	EXTRA.
Fixtures to raise the Head and Tail Stocks, and Tool to bore out and swing 17 inches in diameter,	$10.00
Two Rests, with Sockets, for Hand Turning,	2.50
A Countershaft can be substituted for Foot Power at same price. If both Foot Power and Countershaft are included, add	15 00

The Lathe swings 11 inches on the face plate, and 6½ inches over the tool carriage. With its back-gearing and cone pulleys the Lathe has a great range of speed.

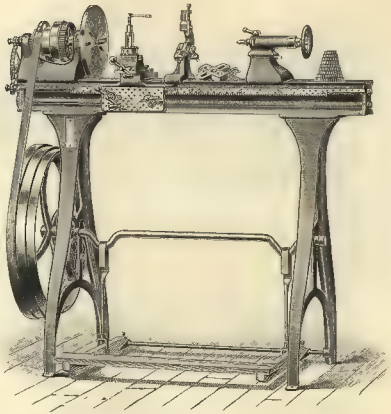
The head stock has a steel spindle with ½ inch hole through its entire length. The tail stock can be readily set at any desired point, or taken altogether from the lathe bed, thus leaving it free for face plate or chuck work. It can also be set over for turning tapers. The spindles of both head and tail stocks are of steel, with positively true taper holes for the reception of the centers, and the tail stock center is self-discharging. The tool can be set to work at any position or angle desired; also to bore a taper hole or turn a ball, features not ordinarily in the movements of tool carriages. All the works are securely protected from chips and dirt, thus insuring long wear and durability to the most costly and vital parts of the lathe. The gearing furnished can be combined to make different leads of thread from 4 to 40, besides many others not mentioned on the index plate. As a right or left screw-cutting lathe it is simply perfect. All the gearing is cut from solid metal in the best machinery known for gear cutting, and is as true and noiseless as it is possible for metal gearings to be.

Bed—Extra Length. The Nos. 5 and 5A Velocipede Lathes, with their present dimensions, are in true proportion. Gunsmiths and others often require a greater length of bed, and do not care for proportionate strength in other parts. For such we can furnish a bed that will admit of 40 inches between centers

When it is possible to do so, Chucks should be Fitted to Lathes before being Shipped.

LATHES.

Fig. No. 01702



Barnes', New No. 5F, with Foot Treadle.

		EXTRA.
Fixtures to raise the Head and Tail Stocks, and Tool Post to bore out and swing 17 inches in diameter,		$10.00
Two Rests with Sockets for Hand Turning,		2.50
A Countershaft can be substituted for Foot Power at same price. If both Foot Power and Countershaft are included, add,		15.00

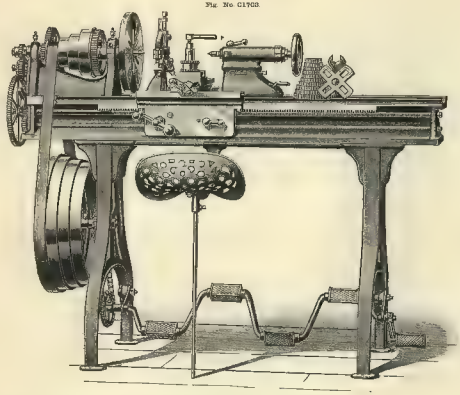
The Lathe swings 11 in. on the face plate, and 6⅝ in. over the tool carriage. With its back-gearing and cone pulleys the Lathe has a great range of speed. The head stock has a steel spindle with ⅞ in. hole through. The tail stock can be readily set at any desired point, or taken altogether from the lathe bed, thus leaving it free for face plate or chuck work. It can also be set over for turning tapers. The spindles of both head and tail stocks are of steel, with positively true taper holes for the reception of the centers, and the tail stock center is self-discharging. The tool can be set to the work at any position or angle desired; also to bore a taper hole or turn a ball, features not ordinarily in the movements of tool carriages. All the works are securely protected from chips and dirt, thus insuring long wear and durability to the most costly and vital parts of the lathe. The gearing furnished can be combined to make different leads of thread from 4 to 40, besides many others not mentioned on the index plate. As a right or left screw-cutting lathe it is simply perfect. All the gearing is cut from solid metal in the best machinery known for gear cutting, and is as true and noiseless as it is possible for metal gearing to be.

Bed—Extra Length. The Nos. 5F and 5FA Lathes, with their present dimensions, are in true proportion. Gunsmiths and others often require a greater length of bed, and do not care for proportionate strength in other parts. For such we can furnish a bed that will admit of 40 inches between centers.

When it is possible to do so, Chucks should be Fitted to Lathes before being Shipped.

LATHES.

Fig. No. C17GB.



Barnes', New No. 5½, Velocipede.

No.	Length of Bed.	Distance between Centers.	Swing on Face Plate.	Swing over Carriage.	Hollow through Spindle.	Weight of Lathe.	Weight, Boxed.	EACH.
5 1-2. Velocipede.	5 ft.	33 in.	13 in.	8 in.	½ in.	640 lbs.	775 lbs.	$135.00

	7 ft.	57 in.	13 in.	8 in.	½ in.	740 lbs.	880 lbs.	165.00
	8 ft.	69 in.	13 in.	8 in.	½ in.	790 lbs.	930 lbs.	180.00

EXTRA.

When Countershaft is taken instead of Foot Power, add $5.00

The No. 5½ Velocipede Lathe is designed to do as large work as it is practical to do by foot power. It is a strong, substantial lathe for a job or manufacturing shop, where the demand on a lathe is from the smallest to the largest work.

It has our patent twin screw feed and screw cutting combination, which makes change of feed in tool carriage instead of in the head stock. This greatly simplifies and reduces the number of parts commonly used for these purposes

The tail stock has side movement to adjust centers for turning tapers. The head stock has hollow spindle for rods up to ½ in. All the gearing is cut from solid metal. All parts are made of steel, where this would best serve the purpose. It will cut all ordinary threads from 4 to 40, and miscellaneous threads up to 154.

When it is possible to do so, Chucks should be Fitted to Lathes before being Shipped.

STEEL PRESSURE BLOWERS.

Fig. No. C1048

The improved journal, we believe to be the best construction ever introduced in Blowers. Great pains have been taken to make this the most perfect, simple and durable in every respect. As will be seen, the different parts are held together by bolts, and its simplicity will be found of great value in case of repairs, which can be easily made by any mechanic, avoiding the necessity of sending back to maker, or taking the Blower apart. They contain an admirable oiling arrangement, by which the oil can not work into the pulleys and belts, the oil passing out of the inner end of the journal, drops down into a chamber, from which it can be removed by the faucet. All shafts are of the best steel. The blast wheel is made of the best composition brass and galvanized iron.

Especially adapted for Iron Foundries and Machine Shops, and will produce a stronger blast than any other Blower.

Buffalo Steel Pressure Blowers.

No. of Blower	Size of Blower.	Weight, Each, Pounds.	Diam. of Pulley.	Face of Pulley	Diam. of Outlet	Each, without Counter Shaft
1	12 in.	25	1¼ in.	1½ in.	3½ in.	$12.00

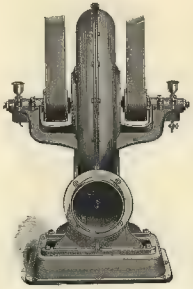
Sizes Printed in Red Ink not Carried in Stock. For Table of Speed, Capacity, Etc., see Page 242.

TABLE OF SPEED AND CAPACITIES OF BUFFALO STEEL PRESSURE BLOWERS.

Fig. No. C1040.



In putting up a Blower for cupola furnaces, parties should at all times endeavor to place the same as near the cupola as possible, as the passage of the air is retarded by the friction of its particles along the sides of the pipe, and the loss of pressure from this source increases directly as the length of the pipe and as the square of the velocity of the moving air. Where great lengths of pipe are necessary, the sizes or diameter of same should be proportionately increased, as greater velocity and increased power are required to discharge a given amount of air with the same pressure where small pipes are used, the frictional surface being proportionately greater in small pipes than in large, hence great care should be exercised to have the diameter in proportion to the length. All right angles or abrupt turns in blast pipe should be avoided, as they greatly diminish their capacity. When it is necessary to make turns in the pipe, easy curves should be introduced.

These Blowers are unsurpassed for efficiency, durability and workmanship. Every Blower is carefully tested before leaving factory.

Table of Speeds and Capacities Applied to Cupola Furnaces.

No. of Blower.	Diam., inside of Cupola Blower will supply	Melting Capacity, lbs per hour	Speed, Revolutions per minute.	Cubic feet of air per minute	Pressure of Blast in ounces
4	20 in.	1200	4200	330	5
5	26 in.	1900	3800	513	6
6	30 in.	2880	3400	780	7
7	35 in.	4000	3100	1135	8
8	40 in.	6000	3000	1626	10

In explanation of the above table, would say the number of cubic feet of air, and the pressure of blast in ounces given are perfectly accurate when the number of revolutions is the same as given. Either or both can be increased, but will require a proportional increase of speed. The diameters of cupolas given are the greatest recommended for the different sizes of Blowers, and where there is a surplus of power, would recommend the next size larger Blower being used.

Table of Speeds and Capacities Applied to Forge Fires.

No. of Blower	No. of Forges Blower will supply	Revolutions per Min., 4 oz. pressure.	Cubic feet of air.	Revolutions per Min., 6 oz. pressure.	Cubic feet of air.
1	1	4500	94		
2	2	4400	172		
3	3	4300	280		
4	5	3700	586	4500	443
5	7	3100	826	3760	625
6	10	2500	780	3010	894
7	14	2225	1010	2926	1287
8	20	1900	1442	2200	1905

In explanation of the above table, would say the number of revolutions per minute given is perfectly accurate where 4 oz. pressure is desired, which will be found strong enough for most purposes. Some fires may even be run at a pressure equal to 2 or 3 oz. Great lengths or small diameter of the blast pipe will require an increased speed to maintain the same amount of pressure at the forge.

For Prices see Page 241.

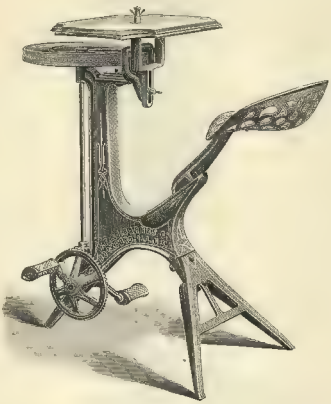
FOOT POWER FORMERS.

Fig. No. 01746.



Barnes', Improved.

EACH.

No. 2—Barnes' Former, **without Knives,** $20.00

The cut represents a machine for moulding edges of brackets, scroll work, panel work, regular and irregular mouldings of all styles up to ½ in. The speed of the knives is from 4,000 to 4,500 per minute. By the aid of our Patent Velocipede Foot Power, the knives are, at the will of the operator, caused to rotate in either direction that the grain of the wood may require, thus avoiding all complicated devices for reversing motion usually employed on single spindle formers. The great speed of the knives ensures rapid and smooth work

The spindle and its bearings are of cast steel, with adjustments to take up the wear. The parts to set the machine for the use of different knives and work are convenient. The table can be lowered to give 2½ in. between it and the lower cutting edge of the knife.

Weight, Boxed Ready for Shipment, 110 Lbs.

FLUTING ATTACHMENTS.

Fig. No. 01747.

Barnes'.

EACH.

Barnes' Fluting Attachment, for No. 2 Foot Power Formers, ... $3 00

The above cut represents an attachment to be used on the Former, for fluting table legs, etc., as the leg in the cut shows. *A* shows the edge of the pattern, the shape of which regulates the cut on the leg lengthwise.

The index plate is spaced to make several divisions of a circle, and is regulated by the snap latch at *B*. *C* is a screw center with which the leg is fastened in place.

This attachment has all the adjustments necessary to work legs of usual length, and up to 3 inches in diameter.

CUTTER HEADS.

Fig. No. C1742.

EACH.

No. 1—Cutter heads, Widths, $\frac{1}{16}$, $\frac{1}{8}$, $\frac{3}{16}$, $\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, $\frac{7}{16}$, $\frac{1}{2}$ in., for Barnes' Combined Machine, (Page 376), ... $1.50

They will cut either with or across the grain, or across the end of stuff. These are fitted to use on the Saw Mandrel of the Combined Machine for cutting grooves, gains, dadoes, rabbets, etc., joints for boxes, drawers, etc.

Fig. No. C1743

No. 3 Cutter Heads, with 1 pair of Straight Knives, for Barnes' Combined Machine, (Page 376)

Inches,	$\frac{3}{4}$	$\frac{7}{8}$	1	$1\frac{1}{4}$	$1\frac{1}{2}$	$1\frac{3}{4}$	2
Each,	$3.50	3.50	3.50	3.50	3.50	3.50	3.50

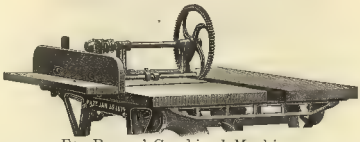
EACH.

Extra Knives, all Sizes, ... $0.75

Can be used to cut gains, dadoes, to rabbet, edge-up or joint stuff. Are used by builders to make window and door frames. Each width knife requires a corresponding width of cutter head.

BORING ATTACHMENTS.

Fig. No. C1744.



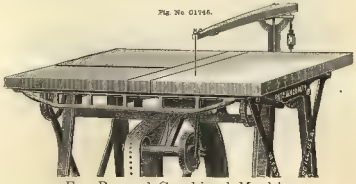
For Barnes' Combined Machine.

For Price, see Page 376.

It has a sliding table on which the work is placed; this moves on substantial ways, which carry the material uniformly to the auger or bit. It also has a stop to govern the depth of the hole. The table is adjustable, up and down; and as the work can be run from side to side, between stops, in the usual way, all the adjustments necessary for general use are provided for.

SCROLL SAW ATTACHMENTS.

Fig. No. C1745.

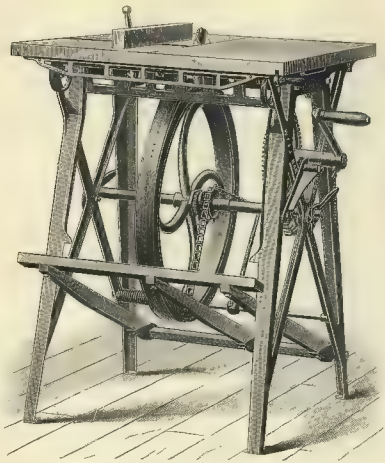


For Barnes' Combined Machine.

For Price, see Page 376.

COMBINED MACHINES.

Fig. No. 01741



Barnes', Improved.

	EACH.
No. 1—Combined Circular, Scroll Saw and Boring Attachment, including 2 Circular Saws, 12 Assorted Scroll Saws, the Boring Attachment, with Self-Centering Drill Chuck, all combined in one Machine,	$50.00
No. 2—Combined Circular and Scroll Saw, including 2 Circular Saws and 12 Assorted Scroll Saws,	40.00
No. 3—Circular Saw only, including 2 Circular Saws, 1 Rip and 1 Cross Cut,	35.00
No. 4—Scroll Saw only, including 12 Assorted Scroll Saws,	32.50

When either the Circular Saw, Scroll Saw or Boring Machine has been ordered separate, the other parts can be furnished, if the number of the Machine is given, at the following prices:

	EACH.
Circular Saw Attachment, Mandrel and Boxes, with 2—6 in. Circular Saws, 1 Rip and 1 Cross Cut,	$10.00
Scroll Saw Attachment, including 12 Assorted Scroll Saws,	7.50
Countershaft for Steam Power,	10.00

For light ripping, cutting to length, cutting joints, drawer and box work, etc., the Circular Saw of the Combined Machine is invaluable

The Circular Saw, while remaining on its Mandrel, can be taken at once out of the way when the Scroll Saw is to be used. The Mandrel is set in its bearings in such a manner as to enable the operator to take the whole Mandrel and Saw from the Machine in an instant. The price of an extra Mandrel is $5.00, if ordered with the Machine. The table to the right of the Saw is mounted on truly planed iron ways; on it as the material is placed, at any desired angle, and moved to the Saw with perfect accuracy. The table can be handily adjusted up or down, by a screw, to allow any desired depth of cut being made by the Saws or Cutter Tools. The Circular Saws are 6 inches in diameter, and reach 1½ in. above the table.

Emery Wheels, in size up to 1 in. face by 6 in. diameter, can be used to good advantage on this Machine.

For Illustrations of Extras for above Machine, see Page 377.

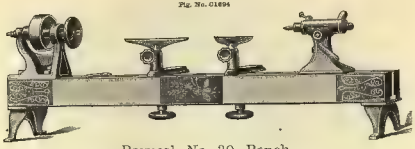
LATHES.

Fig. No. G1694



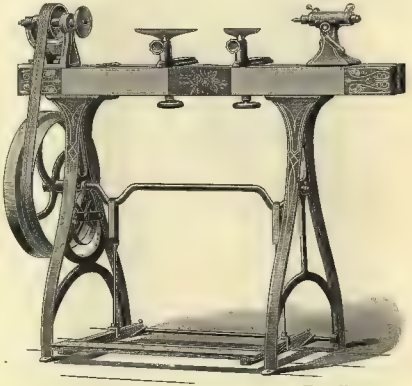
Barnes', No. 30, Bench.

EACH.

No. 30—Bench, for Wood Turning, Weight, 75 lbs., **without Foot Power,** $20.00

This Lathe is designed for Wood Turning; will take in stuff 9½ inches in diameter, and 3 feet long: Speed can be varied from 1,000 to 2,000 revolutions per minute, Seat can be moved readily along to any part of the Bed that the work requires; the Lathe is made entirely of Iron and Steel, except the Bed, which is Wood: Centers are accurately fitted to Taper Holes; no Wrench is required to adjust the Tail Stocks or Tool Rests and Sockets, Hand Wheels being used instead; 3 Centers (1 a Spur), 2 Tool Rests and Sockets, and 1 Turned Face Plate.

Fig. No. G1695.



Barnes', New No. 3F, with Foot Treadle.

EACH.

No. 3F—Including 3 Centers, 2 Tool Rests and Sockets and Face Plate, ... $35.00

This Lathe is designed for Wood Turning; it will take in stuff 12 inches in diameter and 3 feet long; the Speed can be varied from 1,000 to 2,000 revolutions per minute; the Lathe is made entirely of Iron and Steel, except the Bed, which is of Wood; the Spindle is of Steel, fitted up in the best manner; all the Bearings are of Steel, making them strong, durable and light running; the Centers are accurately fitted to Taper Holes; no Wrench is required to adjust the Tail Stock or Tool Rests and Sockets, Hand Wheels being used instead; Weight, 230 lbs.

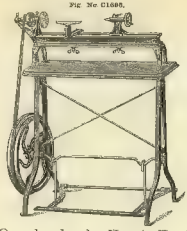
Boxed, Ready for Shipment, Weight, 320 lbs.

When it is possible to do so, Chucks should be Fitted to Lathes before being Shipped.

SIMMONS HARDWARE COMPANY

LATHES.

Fig. No. C1686.

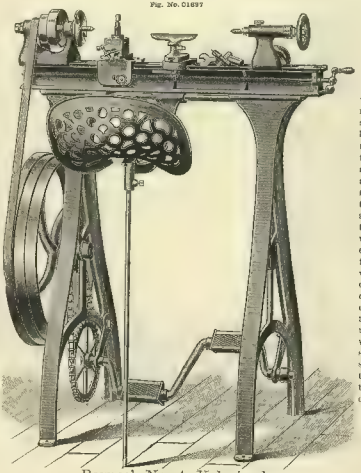


Quackenbush, No. 1, Foot.

EACH

No. 1—Quackenbush. **For Amateurs,** Foot, 2 Speed Cones, 6 in. Swing, 30 in. between Centers, Weight, 115 lbs., . . . $22.00

Fig. No. C1697



This Lathe is designed for turning both Wood and Iron, and for boring, drilling, polishing, etc. It is not an amateur tool, but is strictly mechanical in every respect. It will take in work 7 inches in diameter and 20 in. long. The speed can be varied from 1,500 to 2,000 revolutions per minute, and the motion can be started, stopped, or reversed instantly, at the will of the operator. The Lathe is made entirely of Iron and Steel. The bed is solid, and has V-shaped projections, over which the head and tail stocks and hand and slide rests are fitted. The leading screw for the tool carriage is operated by hand; by it the tool carriage can be traveled 30 in., the entire distance between the centers. The carriage can be engaged or disengaged instantly from the leading screw.

The upper or cross slide ways on which the tool post moves can be set at any desired angle, and tapers can be turned and taper holes bored to the extent of its travel on these ways. The arrangement of the tool post and carriage is such that balls can be turned. The tail stock can be moved and set at any point desired, by the simple turning of a hand wheel; or it can be taken off entirely, thus leaving the bed free for face-plate or chuck work. The head stock spindle has taper bearings, and can be adjusted with as much delicacy as a jeweler's lathe; that of the tail stock is moved by a screw and hand wheel. The head and tail stock spindles are made of steel, and have truly fitted taper centers, and that of the tail stock is self-discharging.

TACKLE BOXES.

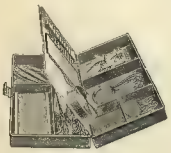
Fig. No C6402

Borcherdt's Tackle Boxes.

		EACH
No. 110	9½ x 7 x 3, has **1 Tray,** space for 2 Reels, Trolling Line and **16 Pockets,**	$3 50
No. 120—12½ x 8 x 4½, has **3 Trays,** space for 2 Reels, Trolling Line, etc., and **24 Pockets,**		5.50

These boxes are of the same dimensions, arrangement and finish as our Nos. 10 and 20 (see below), and in addition have a series of pockets, as shown in the cut. The pockets are made of waterproof parchment paper, reinforced with tape, and are folded into two pieces of tin, one of which is permanently attached to the cover, and the other movably attached by a simple turn-buckle, rendering the contents of the pockets readily accessible. This device only adds one-eighth of an inch to the height of the box, but practically doubles its capacity.

Fig. No C6404



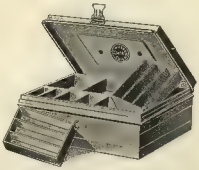
No. 01.
Pocket Fishing Tackle Boxes.

		EACH
No. 01—7 x 4 x 1½ in.,		$1.25

This box has a center leaf which projects slightly beyond the two halves of the box, so that when the box is opened this leaf is caught and raised with the half uppermost, thus retaining in their places the tackle in that half.

To this leaf a row of corks are attached, into which hooks may be inserted, their snells being slipped under the double part of the leaf, as shown in cut. The well is to make a space for gang hooks attached to trolling spoons.

Fig. No C6403



No. 20.
Fishing Tackle Boxes.

		EACH
No. 10	9½ x 7 x 3, has **1 Tray,** space for 2 Reels and Trolling Line,	$2 50

GASOLINE STOVE FURNITURE.

Fig. No. C3121.

Patent Convex Broilers.

PER DOZEN.

Patent Convex Broilers= $8.00

The Convex top surface of this Broiler is composed of grooves running from the center outward to a circular groove, into which the gravy runs.

Fig. No. C3122.

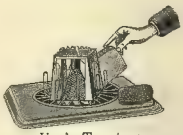
North's Ventilated Broilers.

PER DOZEN.

North's Ventilated Broilers= $10.50

What is wanted in a Broiler is to close the pores of the steak and retain all the juices and not taint or blacken with smoke. This Broiler accomplishes this perfectly.

Fig. No. C3123



Jim's Toasters.

For Toasting Bread on Gasoline Stoves.

PER DOZEN.

Jim's Toasters $6.00

Toasts quickly and evenly, from one to four slices of bread in two minutes. Attachment on top for tea or coffee pot. No smoke. No smell.

Fig. No. C3124.

Stoveware Adjusters.

PER DOZEN.

Stoveware Adjusters= $7.50

Fits either No. 7, 8 or 9 Ware.

Is specially adapted for the use of round or pit bottom ware and Waffle Irons on Gasoline Stoves. Also equalizes and retains the heat under all cooking vessels.

Fig. No. C3125.

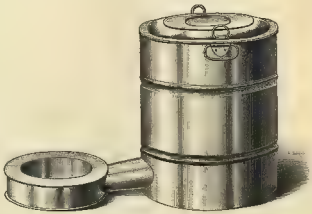
Tea Kettles and Steamers.

EACH.

Tea Kettles and Steamers $2.00

The foods cooked in these Steamers do not partake of each other's flavors, and cook rapidly. The Tea Kettle can be used separately when desired.

Fig. No. C3126.



Hot Water Reservoirs.

EACH.

Hot Water Reservoirs= $2.00

This Reservoir is a great convenience, as it can be placed on end shelf of Stove, with the ring over burner, so that the flame is directly in center of it.

Davis', Iron.

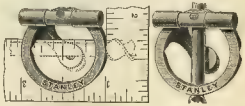
PER DOZEN.

No. 17—For Square or Straight Edge, 3½ in. Long, . $3.00

One Dozen in a Box.

BIT AND SQUARE LEVELS.

Fig. No. C529



PER DOZEN.

No. 44—Bit and Square Level, Brass Frame, . . $3.60

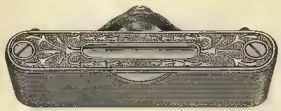
A thumb screw secures the Level to the Bit, and boring can be done with perfect accuracy as to perpendicular, horizontal, or angle of forty-five degrees, by observing the bubble-glass while turning the Bit.

The Frame can also be attached to a Carpenters' Square. Two shoulders rest on the top of the horizontal leg of the square, thus making it an accurate Spirit-Level; and the upright leg of the square will then indicate an exact Plumb-Line

One-twelfth Dozen in a Box.

POCKET LEVELS.

Fig. No. C532



PER DOZEN.

No 40—Cast Iron Top Plates, Japanned, . . $2.50

SIMMONS HARDWARE COMPANY

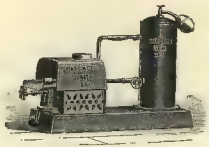
GEM GASOLINE SOLDERING FURNACES.

Fig. No. C2912.



Gem Gasoline Soldering Furnaces.

	EACH.
Gem, with **Tin** Reservoir,	$10.00
Gem, with **Copper** Reservoir,	12.00

We guarantee that every Furnace can be worked out of doors or on roofs in all kinds of weather.

The Burner is Cylinder in shape, and made of Cast Iron, and cannot burn out. It is so constructed, and the shape is such, that the **Solder** from the Soldering Coppers **cannot fall into the perforations.** It is noiseless and a powerful heater. The heat is distributed full length of Coppers. It is light and provided with a handle, making it portable. It is supplied with our Pneumatic Reservoir, which cannot be filled while Burner is burning. By the use of same all accidents are prevented. The Resting Plate on which Coppers rest, is but five inches from workman's bench, and hood opening is of sufficient size to admit the largest size Coppers, which can be readily heated in a short time. It is also provided with a sliding cut-off and drip cup, of which knob is always cool. The patent Rubber Bulbs used on our Furnace are of the best quality, and will wear for an indefinite time.

TINNERS' STOVES.

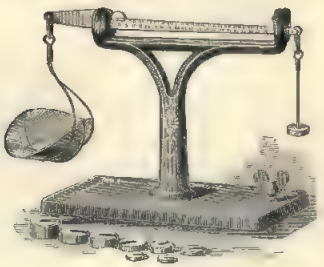
SAMPLE WEIGHING SCALES.



FOR ACCURATE WEIGHING.

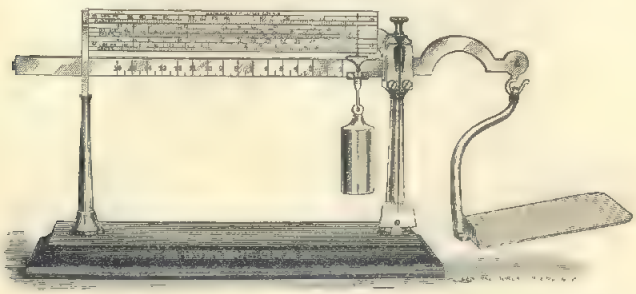
$10.

This scale will weigh one pound by ten thousandths of a pound. It is well adapted for weighing small articles, screws, samples of paper, color, drugs, &c., for the purpose of computing large quantities. It also answers as a postal scale. The finished parts are all nickel-plated, and the stand is japanned and ornamented. Nine balancing weights accompany the scales, viz.: One each respectively of 100, 200, 400, 800, 1000, 2000, 3000, 4000 ten thousandths, and also one ounce weight for postage weighing.

7000 Troy grains equal one pound avoirdupois.
One ten thousandth of a pound equals 7/10 of a grain.
1562½ " " " " 11 " " of an ounce.
3 2/7 " " " " 32 " "
4883 " " " " 50 " "
0'5 " " " " 1 ounce.

2500 ten thousandths of a pound equals ¼ of a pound.
5000 " " " " ½ " "
7500 " " " " ¾ " "

We also make a scale to weigh by the metric system to 1-100 gramme. Weights, 1, 2, 5, 10, 20, 40, 60, 100 and 200 grammes.



ESTIMATOR

To operate the Estimator it is only necessary to place the article on the scale pan, slide the poise until the scale balances, then the indicator on top of poise will point to the result in pounds, ounces, and fractions of an oz., HOW MUCH MATERIAL WILL BE NEEDED PER 1000, 100, GROSS AND DOZEN, and on the beam where the poise slides, the weight of the article itself will be given.

Two styles, one for weighing articles up to one pound, and one for small articles not heavier than 2 oz. The first enables the operator to estimate on goods whereof 1000 make 1 lb.

Either style, ... $30 00
Polished Walnut glass case front sliding door for same, if wanted, . . 10 00

ESTIMATED WEIGHTS OF BARBED WIRE,

Showing number of pounds of Barbed Fencing required to fence space or distance mentioned, one, two or three Strands to the Fence.

TABLE OF WEIGHTS.

1 Foot in length,	1 Strand, 1½ oz.	2 Strands, 2¼ oz.	3 Strands, 3 7/16 oz.
100 Feet in length,	1 Strand, 7 lbs.	2 Strands, 14 lbs.	3 Strands, 21 lbs.
1 Rod in length,	1 Strand, 1¼ lbs.	2 Strands, 2¼ lbs.	3 Strands, 3⅜ lbs.
100 Rods in length,	1 Strand, 113 lbs.	2 Strands, 226 lbs.	3 Strands, 339 lbs.
1 Mile in length,	1 Strand, 365 lbs.	2 Strands, 730 lbs.	3 Strands, 1095 lbs.
1 Square Mile,	1 Strand, 1460 lbs.	2 Strands, 2920 lbs.	3 Strands, 4380 lbs.
1 Square Acre,	1 Strand, 58 lbs.	2 Strands, 116 lbs.	3 Strands, 174 lbs.
1 Side of an Acre,	1 Strand, 14½ lbs.	2 Strands, 29 lbs.	3 Strands, 43½ lbs.
1 Square Half Acre,	1 Strand, 41 lbs.	2 Strands, 82 lbs.	3 Strands, 123 lbs.
1 Side of a Square Half Acre,	1 Strand, 10¼ lbs.	2 Strands, 20½ lbs.	3 Strands, 30¾ lbs.

Double Strand Barbed Wire, "Cattle," Averages 15 Feet to the Pound; "Hog," 14 Feet to the Pound.

In regard to the distance apart that posts should be set: Most farmers having been accustomed to putting up a board fence, with posts 8 to 12 feet apart, find it hard to adopt the way of putting them from 16 to 30 feet from each other for barbed wire; but it should be remembered that there is no strain against a barb fence; it affords no resistance to wind or snow, and cattle cannot get against it to push it down.

In regard to the number of lines of wire to be used for a fence, it varies according to circumstances. For Cattle two lines are thought by some large stock-raisers to be sufficient, putting the lower wire 22 inches and the upper 44 inches from the ground; but three wires are generally used, and make a good, substantial fence, the lower wire 12 inches, the middle wire 26 inches from the ground. For a *perfect fence,* and one that will keep out dogs, pigs, poultry, etc., use four lines of wire. Put lower wire 4 inches, next 12, next 24, and top line 48 inches from the ground.

Miller's Falls Anvil, Vise and Drill.

EACH.

Miller's Falls Anvil, Vise and Drill, Weight, 80 lbs., . . $18.00

When Chuck is removed, Drills with ½ in. Round Shank can be used.

The Anvil has a steel face 4 x 8 in. Vise Jaws, 2½ in. wide, and steel faced. Steel Drill Press with adjustable Chuck to hold ¼ in. drills and all smaller sizes. The article to be drilled can be held firmly in the Vise, so as to be drilled at any angle. A bolt of iron or soft steel can be drilled accurately down through the center, which cannot be done by hand with any other tool. When the Drill is sold without the Anvil, it is attached to an Offset Vise, as seen in the left hand cut. This Vise has steel faced Jaws, 3½ in. wide, which entirely overhand the screw and the box which covers it. For many purposes this is the most convenient Vise in use.

SAWS.

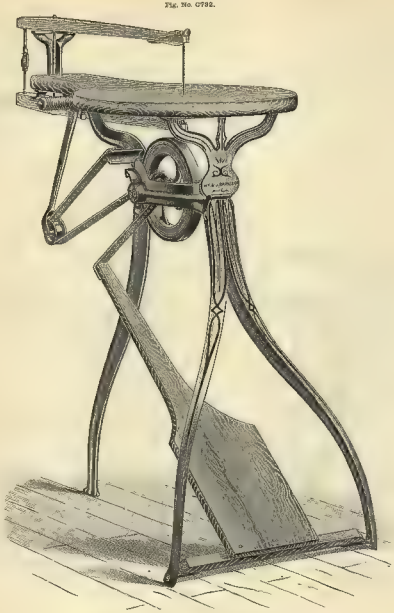
Fig. No. C782.



Barnes', Scroll, Improved.

EACH.

No. 7.—Barnes', including 12 -7 in. Saw Blades, Assorted, ... $15.00

With reasonable practice will saw at the following rates. Pine, 3 inches thick, 1 foot per minute; 1 inch thick, 4 feet per minute. Walnut, 3 inches thick, ¼ foot per minute; 1 inch thick, 2 feet per minute; and other woods and thicknesses at proportionate rates.

The ordinary rate of speed when sawing is from 800 to 1200 strokes per minute. The saw leaves the work as smooth as it is possible for any saw to do, and can be taken out and replaced in an instant for inside work.

The swing around the blade under the arm, is 24 inches. The length of blade is 7 inches. The table and arms are made of hard maple. The frame is made of cast iron, strong, yet light. The balance wheel runs on steel arbors. Weight, 55 pounds.

For Scroll Saw Blades, see page 180.

Boxed, Ready for Shipment, Weight, 80 lbs.

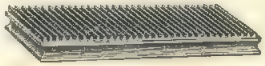
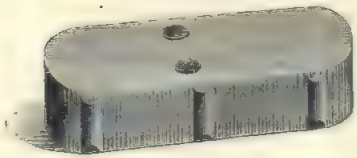
CARD STRICKLE.



$3 50

CARD PLANE.



$7 50

For raising jams and removing hooks on points caused by too hard grinding.

DIRECTIONS FOR USING PLANE

When a jar occurs in steel wire Card Clothing, press the plane down hard on the points of the teeth, pushing against the points. This will raise up any common jam, and smooth up the Clothing.

The blade in plane can be raised or lowered to suit the depth of the jam, by means of two large screws on top of planer. Do not be afraid to bear down hard on the Clothing, and push the planer against the points.

If a Doffer seems rough, and not smooth on the face, the use of the plane will do a great deal towards making it smooth and even.

To use it for this purpose, have the blade project not over 1-64 or 1-16 of an inch above the face of the planer.

If Doffer revolves with points toward you, put planer at commencement of fillet, and as the Doffer turns, carry the plane across to the other end, following the line of the fillet.

This will give a good smooth surface to almost any rough feeling Doffer.

It may be necessary after this to grind Doffer slightly, or sharpen with Card Strickle.

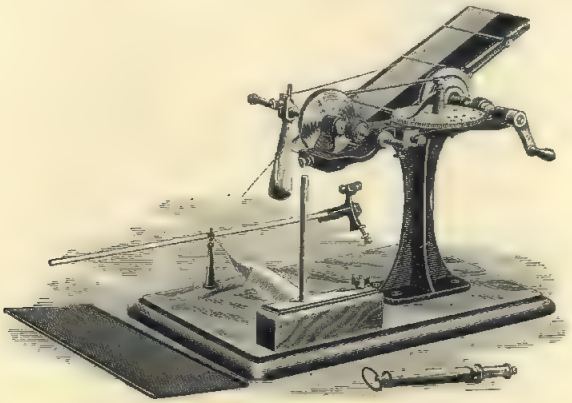
WALLWORK'S COMBINATION
YARN TESTING AND INSPECTING MACHINE.



IMPORTANT ADVANTAGES

1st. The card when full contains a Lea.

2d. The yarn being wound on a black card clearly shows the good and bad qualities at a glance. The cards can be saved for comparison or sent out for examination.

3d. The elasticity of one yarn, compared with another is accurately shown.

4th. The number of yards wound upon card is accurately shown upon the dial.

5th. It is arranged to show breaking strain accurately from 20 to 120 pounds.

6th. It is arranged to show twist per inch in doubled yarns from 0 to 18.

7th. The breaking strain of single yarn can be shown and registered.

8th. Colored or mixed cotton or woolen yarns can be wound to show effect on a card 13½ x 4½ inches

This machine is invaluable for accurate office work as it is very correctly adjusted. It is mounted on a bay wood stand and the running parts are nickeled, making an ornamental piece of furniture for any office.

No. 744XL—44 Caliber, 24 in. Barrel, Weight 5 lbs., ... 10.00

One in a Cardboard Box; 10 in a Case.

The XL Shot Gun is an entirely new arm made to meet an existing want for a cheap, perfectly safe, light and good shooting gun, that can be taken apart without tool and put into a very small compass. The ammunition does splendid shooting at 30 yards.

It has a rebounding lock, and a vertical sliding breech block, operated by the guard as a lever, which, when thrown down, ejects the empty shell from the chamber, and with sufficient force to carry it 6 or 8 feet from the shooter. The importance of this feature is alluded to as permitting very rapid firing. The barrel is fastened to the frame by a tapering screw key, easily removed by the hand, which passes through the frame and section of the barrel laterally, keeping the barrel always in its proper position, and by its taper shape compensating for any wear of surface.

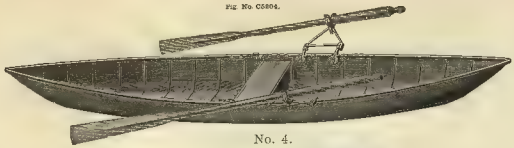
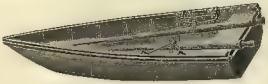
SECTIONAL BOATS.

Fig. No. C5304.



No. 4.



Cut showing the two Sections Nested.

W. E. Bond's Improved Boats.

For Exploring, Fishing, Hunting, Trapping and Traveling.

Materials and Fittings.

The sides are of Galvanized Iron, three times as strong as Wood. The part next to the bottom board is lined with a thin board held in place by the ribs to prevent denting.

The Bottoms are air-seasoned, kiln dried and saturated with an oil cement; three-fourths of their liability to swell and shrink is removed.

The Rowlocks are of the Y or yoke pattern. The Outriggers are a very late improvement, made so as either to turn down and hang inside, or take out.

The Sculls are of ash. A pair of Sculls and Rowlocks are furnished with every Boat.

Each Boat has an Air Chamber attached, to prevent sinking when filled with water.

In wild fowl shooting the sections are often used separately, and in making portage it is frequently desirable to have them detached

At an extra cost of **$10.00** for Mast and Sail, and **$7.00** for Deck, Step for Mast, and Iron Lee-Board, these can be made excellent Sail Boats.

No. 4 Boats, each, $35.00

Extreme Length, 15 feet. Midship Height, 11 in. Carrying Capacity, about, 800 lbs. Extreme Width, 36 in.

Either section of a 15 or 16 ft. boat will carry one person. Weight about 100 lbs.

Method of Spinning before the introduction of Brown Bros. & Co.'s Improved Light Running Watch Spring Temper Travelers.

RING TRAVELERS.

We manufacture the "Shaw" Improved U. S. Standard Ring Traveler, the leading traveler of the world. We largely supply the spinners of this country and export them to Great Britain, Germany, France, Spain, Mexico and South America.

Parties ordering them can depend on getting a perfect article, well made and of even temper. We keep in store a large stock of regular sizes and styles, and make to order to suit the ideas of any spinner.

In ordering for a new mill, or for new rings, send a sample ring, that we may fit traveler to it. Parties using our travelers continuously need only state the number desired.

A Package of Stained Boards, with full information, mailed to any address on application.

DEXTER BROTHERS, Sole Manufacturers,
Mention "Harper's Magazine." BOSTON, MASS.

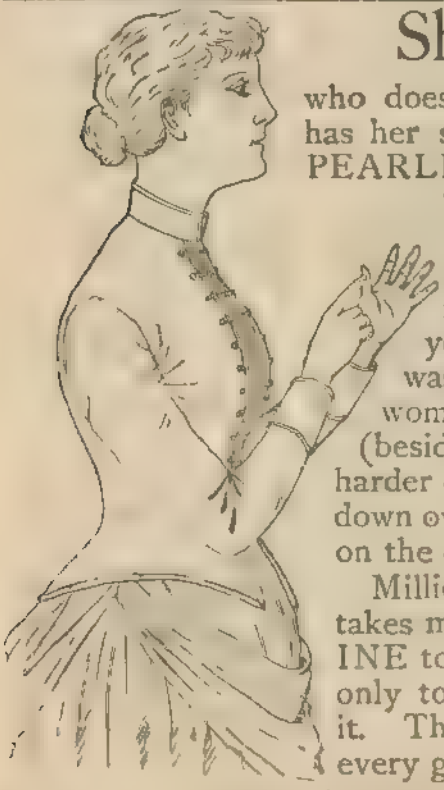
PEARLS IN THE MOUTH.

BEAUTY & FRAGRANCE
Are communicated to the mouth by

SOZODONT,

which renders the teeth pearly white, the gums rosy, and the breath sweet. By those who have used it, it is regarded as an indispensable adjunct of the toilet. It thoroughly removes tartar from the teeth, without injuring the enamel.

Sold by Druggists and Fancy-Goods Dealers.



She reckons well

who does her housecleaning and washing (or has her servants do this work) with PYLE'S PEARLINE.

Why? Because Pearline makes the largest saving all around; saves half the time; half the labor—more than half the wear. Do you know you don't have to rub the clothes when washed with Pearline? This saves the woman and makes the clothes last longer (besides, they look better). What can be harder on woman's health than bobbing up and down over a wash board? What can be harder on the clothes—anything harder don't exist.

Millions of women know these facts well; it takes many millions of packages of PEARLINE to supply their demands for it. You have only to prove these facts and you'll demand it. The best way is—try it. Costs little and every grocer has it.

Beware Peddlers and some unscrupulous grocers are offering imitations which they claim to be Pearline, or "the same as Pearline." IT'S FALSE they are not.

DON'T PERMIT ANY SUBSTITUTE for the "Korrect Shape" as we have arranged to supply any one in the United States who cannot get these goods of our agents [illegible] to their door without extra cost.

The BURT & PACKARD "Korrect Shape" Shoes are made in four grades and each grade, viz., are Hand-made, Hand welt, Burtwelt and Machine Sewed, is stamped on the sole in addition to our trade-mark. This trade-mark—showing the foot in a natural position within a shoe, and also the words "Korrect Shape"—is fully covered under the Patent laws, and we shall be glad of any information where dealers are making use of either of these designs in the hope of deceiving the public.

Our agents should carry all styles in *Congress, Button,* and *Bal* for Gents, Boys and Youths.

All information concerning our different styles, kinds of stock, how to obtain these goods, etc., forwarded by simply naming this publication, with your address in full

PACKARD & FIELD,

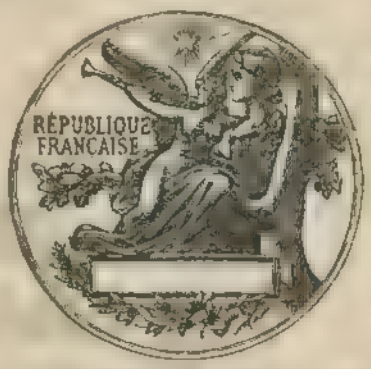
Brockton, Mass.

(Successors to BURT & PACKARD)

If you want PERFECTION in fit, with freedom from CORNS and all DISCOMFORT, you will never wear anything except THE BURT & PACKARD "KORRECT SHAPE" SHOES.

THE CELEBRATED
SMITH & WESSON REVOLVERS

Have been awarded the **GOLD MEDAL** at Paris Exposition in recognition of their superior qualities.



The **accuracy, durability, excellence of workmanship, convenience in loading** and **safety** of these Arms always hold them in the lead and recommend them to all desiring a reliable article.

The **HAMMERLESS SAFETY MODEL**, the latest production of SMITH & WESSON, is so constructed as to render accidental discharge impossible—a perfectly safe arm for house or pocket. Do not be deceived by **Imitations**; the genuine SMITH & WESSON Revolvers are stamped upon the barrels with firm name, address and dates of patents. They are **guaranteed** perfect in every detail. If dealers cannot supply you, orders sent direct to address below will receive prompt attention. Catalogue and prices furnished upon application.

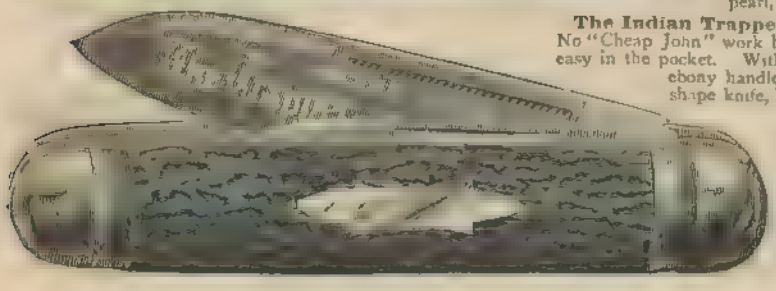
Send to A. W. GUMP & CO., Dayton, Ohio, for prices. New [illegible]

FOUR BIG BARGAINS!

No. 477. Elegant pearl handle, nickel ends, two blades and nail file; highest quality blades. Price, $1.00. This knife is copied from a Rogers pattern made in solid silver and sold by jewelers at $4.00 each. The blades we put in are severely tested and will carry a razor edge. Every dealer who sees it complains at our advertising it at less than $2.00.

This Dainty Knife (No. 85), two blades, ivory or pearl handle, best razor-steel blades; as good as it is pretty. Price [illegible] pearl, ivory, 50 cents; pearl, 75 cents. This [illegible] Holiday offer. **Congress Knife,** 3 blades, [illegible], $1.50; plain handle, $1.00.

No. 801. Here is a gentleman's knife that will speak and cut for itself. 3 blades. Equal to any $2.00 razor. English goods sell for $2.00. Our price, $1.25, post-paid; 3 for $3.00; 6 for $5.00. In quality, temper, design and finish no knife can surpass this. 18,000 sold last Christmas. Same size knife, rich pearl handle, 3 blades, $1.50; ivory handle, $1.00. Elegant Congress knife, 3 blades, pearl, $1.50.



The Indian Trapper. Blades made for service and fine-tested. No "Cheap John" work here. Cut is exact size. Nice in the hand, easy in the pocket. With smooth red handle, 60 cents, post-paid; ebony handle, 65 cents; white or stag, 75 cents. Same shape knife, but much stronger and larger, $1.00.

Heavy 2-blade Jack-knife, **50c.** Maher & Grosh Hunting-knife, $1.00. **Colorado Stock** knife, 3 blades, $1.00. **Family Shears,** best steel, 8 inch, 75c. Razor-steel **Scissors,** 5 inch, 50 cts. **Butcher** knife, 6 inch, 50 cents. Razor-steel **Kitchen** knife, 25 cents. Send for free illustrated 80-page list, also "How to Use a Razor."

MAHER & GROSH,

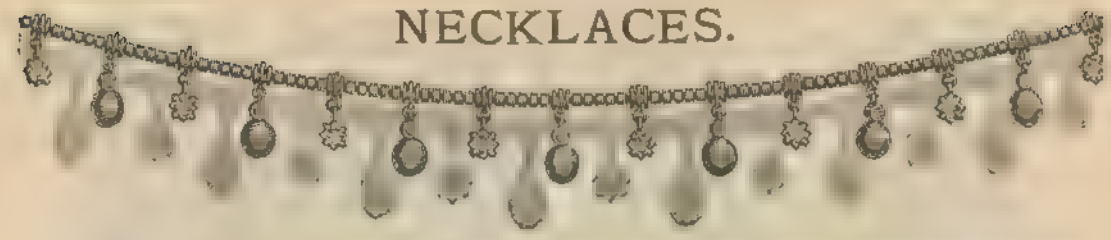
NECKLACES.



The returning use of necklaces has led to the production of many graceful and charming forms of these beautiful ornaments. In the one chosen for the accompanying illustration a slender, flexible chain, of a pretty, gauntly wrought link, serves as a strand from which, along its whole length, are suspended pendants of pearls and diamonds.

In some necklaces of this class the pendent ornaments occupy only a portion of the middle portion of the length, sometimes not more than a quarter of it, a third, or a half. This, by making it possible to use few, or many, precious stones, as may be wanted, admits of almost any desired range in cost.

It also enables this style to be used with advantage in the remounting of diamonds or other precious stones for this use. Special designs, adapted to any number of stones, will be gladly furnished for work of this class. Among necklaces now offered are the following:

Of the general style here shown, set with different numbers of stones, at $325, $425, $500, etc.

Single strands of beautifully matched pearls, the middle pearls larger than the others the gradation of them down to the sizes forming the main portion of the strand being so arranged as to add much to their beauty, $150, $175, $225, and of course to far greater sums, $750 to $1000 commanding particularly choice ones.

Strands of gold beads at all prices from $7, $9 50, $11, etc., to $50. Strands of gold beads and under each bead a swinging, pointed pendant, at $38 and $35 (a new and pleasing style). The same as the preceding except that the pendants are suspended only from a portion of the beads, $25 and $23. A strand composed wholly of blue enamel forget me-nots, on gold (very pretty), at $48.

THEODORE B. STARR,

206 FIFTH AVENUE,
fronting Madison Square, } Between 25th and 26th Streets, NEW YORK.
1126 BROADWAY,

SOLID SILVER FORKS AND SPOONS.

In the sale of solid silver forks and spoons this house endeavors to offer advantages which no intending buyer can afford to overlook.

The patterns are such as meet the present advancing taste for purer outlines and more consistent, and less ambitious, decoration. They are artistic without in any degree losing their character of practical fitness for use. Patterns crowded with over-refined, highly elaborated decoration are avoided, in the belief that such decoration, though it may be beautiful in itself, does not find its proper field in objects of this class.

Great regard is paid to the perfect finish of all work. This is a point in which buyers are, as a rule, not sufficiently discriminative. Some dies are much better cut than others, and produce far better, clearer work. In all these matters we pay strict attention to the niceties of detail that are necessary to a perfect result.

Prices are at a fixed rate per ounce for any number of pieces, from one-half dozen upward. This, in connection with the further fact that the same patterns may be obtained at any future date, enables buyers to form complete sets gradually, by purchasing in modest quantities from time to time.

A clear statement of weights, by which buyers may know exactly what they are getting for their money. Good weights, that supply metal enough to insure the stiffness and durability of the articles, are recommended in all cases. Cheapness, secured by light weights in the beginning, is dearness in the end.

The engraving of initials is done with special care in the most artistic style. It is without charge when consisting of not more than three letters on each piece.

Full size photographic illustrations of fifteen patterns, with statements of weights and prices, will be sent on application. Orders from a distance for any number of pieces, from a single teaspoon to a full outfit chest, will be attended to with care.

THEODORE B. STARR,
206 Fifth Avenue, New York.

Visitor. *"How beautiful. What is it called?"*

Lady of the House. *"It is called "TOILE DU NORD" and is the best wash fabric in the country. You can get it in all the latest French colorings and most striking effects. The colors are absolutely fast and the price moderate."*

Visitor. *"Where can I find it?"*

Lady of the House. *"All the dry goods stores keep it, but you must be sure and buy this brand. The fabric has become so popular, and it is so difficult to supply the demand that many imitations of inferior value are sold as "TOILE DU NORD."*

Transom Lifters.

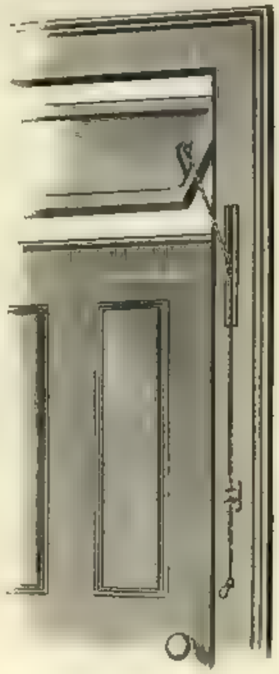
Payson's Universal



For Transoms Hung at Top, Bottom, Center or End.

No. **250**—Bronzed Iron, Rod 3 Feet Long × $\frac{1}{2}$ in. Diameter,	Each,	$0 60
" **251**— " " " 4 " " × $\frac{1}{2}$ in. "	"	70
" **261** " " " 4 " " × $\frac{5}{16}$ in. "	"	1 10
" **262**— " " " 5 " " × $\frac{5}{16}$ in. "	"	1 25
" **273**— " " [illegible] " " × $\frac{3}{8}$ in. "	"	1 70
" **275** " " " [illegible] " " × $\frac{3}{8}$ in. "	"	2 10

Only One Style Lifter in Each Size, adapted to Transoms hung at either top, bottom, center or end
It is operated with One Hand, and the locking device is in Plain Sight.
No danger of heavy Transoms dropping and breaking glass, as it is Self-Locking
It is Burglar Proof, as Transom cannot be moved from any position in which it may be left, from the outside.
The guide and crosshead afford a Wide Solid Bearing for the weight of Transom

$\frac{1}{2}$ in. Rod, for Hotels and Dwellings. $\frac{5}{16}$ in. Rod, for Offices and Medium Transoms. $\frac{3}{8}$ in. Rod, for Large Store Transoms

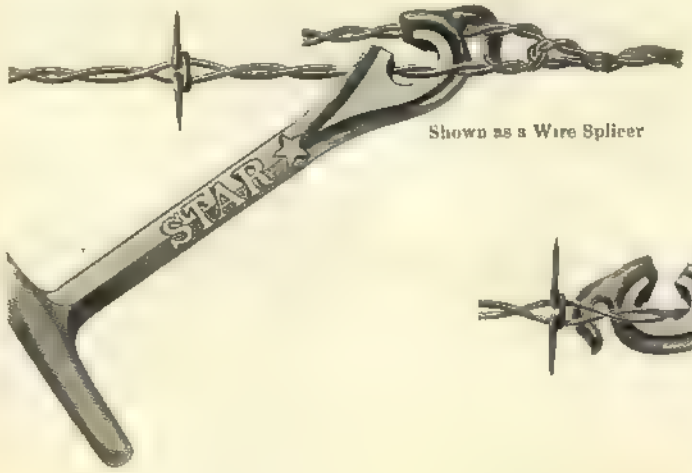
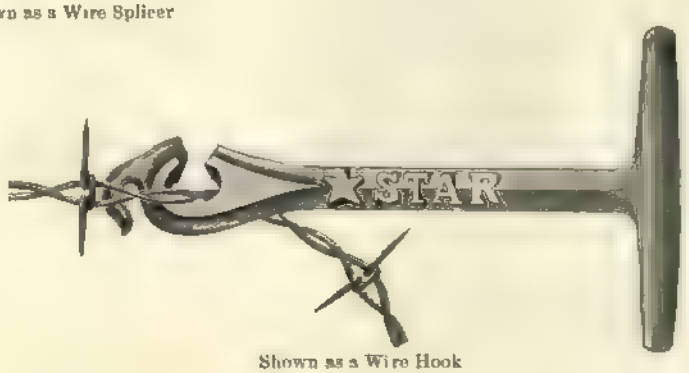
Barbed Wire Hooks and Splicers.

Star.



Shown as a Wire Splicer



Shown as a Wire Hook

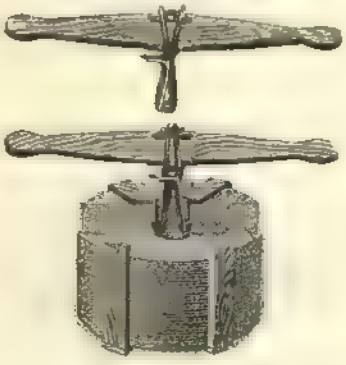
Star Barbed Wire Hooks and Splicers, ... Per Dozen, $1 50

This Tool is almost indispensable in building Wire Fence. Its combined use makes it a necessity to every farmer

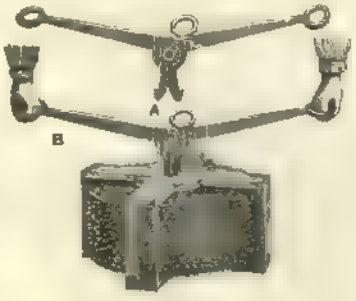
Directions—Hook it on the Wire, as shown in the cut, and turn it around the main wire as many times as desired to make a good splice

Barbed Wire Lifters.

World's Best.



Hawkeye.



For Moving and Carrying Coils of Barbed Wire.

World's Best Barbed Wire Lifters, ... Each, $1 00

Insert the Iron fingers into the Coil of Wire, turn the handle half round, and a perfect clamp on the coil is secured

Hawkeye Barbed Wire Lifters, ... Each, $2 00

Insert the dogs in the center aperture of the Barbed Wire Reel. By lifting the handles the dogs are thrown out and fasten themselves, which enable the operators to carry the spool of barbed wire with ease and safety. To disengage the carrier, press the levers down, grasp the center handle and lift the carrier out.

JOHN PRITZLAFF HARDWARE CO.

Sleigh Bells.

Body Straps.

Polar.

These bells are of superior tone and finish, and being made from one piece of wrought metal, will not crack, as bells made from cast metal often do.

The "Arctic" is the best bell made and has double the vibrating surface that the common bell has.

The "Polar" differs from the "Arctic" in shape, but is fully its equal in tone, style and finish.

The straps are made from the best harness leather.

The bells are riveted on with pure copper rivets, which do not rust, and which wear much better than the iron rivets generally used.

Arctic.

Body Straps, with Arctic Bells, Riveted on.

JOHN PRITZLAFF HARDWARE CO.

Adjustable Plumbs and Levels.

Sectional View, showing mode of Adjustment

The adjusting is done by screws, and when adjusted forms a perfectly solid plumb and level and therefore cannot get out of order. The adjusting screws are covered by the protecting shield C, thereby securing its accuracy at all times. Mechanics can rely on it.

Directions for Adjusting.

To adjust the level, remove protecting shield, loosen flat-head screw *A*; raise or lower round head screw *B* until bubble is true, then tighten screw *A*. To adjust plumb remove the protecting shield, loosen one screw and tighten the other until the bubble is true.

JOHN PRITZLAFF HARDWARE CO

JOHN PRITZLAFF HARDWARE CO

Cross Cut-Saws.

"The Racer," Lance Tooth.

The Fastest Cutting Saw in the World.

"The Racer" stands without a rival and is the Fastest Cutting Saw in the world. It has beaten the best Canadian and American-made Saws 33⅓ per cent in every contest. Its superiority consists in its excellent temper. It is tempered under the Secret Chemical Process, which toughens and refines the steel. It gives a finer and keener cutting edge, and will hold it twice as long as by any other process. None Genuine that are not like the above cut, with registered trade mark with the words "The Racer," and Maple Leaf with our name.

Save Labor—Save Time—Save Gumming—Save Files.

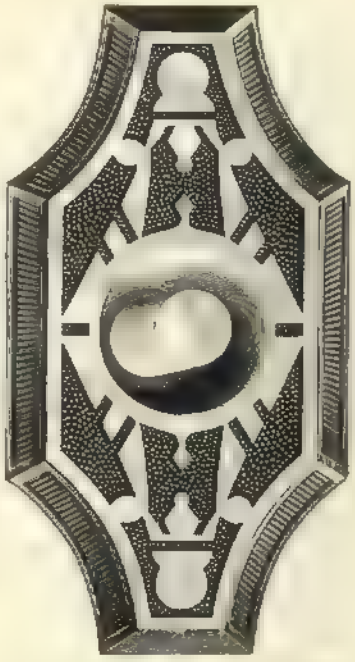
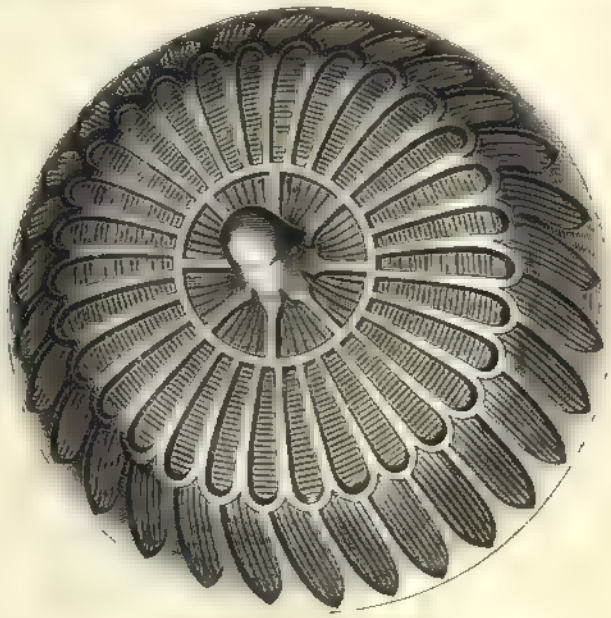
Electic Door Bells.

Pierce's Patent.



Full Size Cut of No 85 Push Button



Full Size Cut of No 65 Bell

Full Size Cut of No 35 Push Button

Full Size Cut of No 25 Bell

No. 25—3¾ in. Real Bronze Bell, with No. 35 Real Bronze Push Button, ... Each, $3 00

" **65**—3½ in. Imitation Bronze Bell, with No. 85 Imitation Bronze Push Button, ... " 2 00

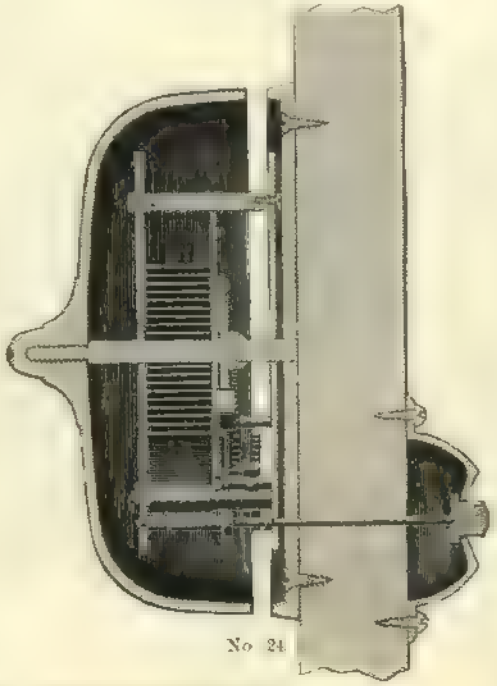
All the effects of the electric bell are produced by the simple mechanism used in the construction of these bells, without the aid of batteries chemicals or hidden wires at a very moderate price Each push of the button gives fifteen blows producing a sweet and resonant tone of continuous vibration.

They are adapted to any thickness of door, and may be used at a long distance Full directions for putting them up accompany each bell

JOHN PRITZLAFF HARDWARE CO

Electic Door Bells.

New Departure.



No 24

No. 24—4 in. Nickel Plated Bell, Real Bronze Push Button, . . . Per Dozen, $33 00
" **25**—5 in " " " " " " " . . . " 42 00

This Bell is made of the best material. The working parts are as carefully made as those of the best clocks, and are much stronger and less liable to get out of order. It can be used on the Door, the Casing, or in the back part of horse. To wind simply turn the Gong a few times. One winding will secure from four to six hundred calls of ordinary duration.

Electric Bell Sets.

Wollensack's Patent

Vises.

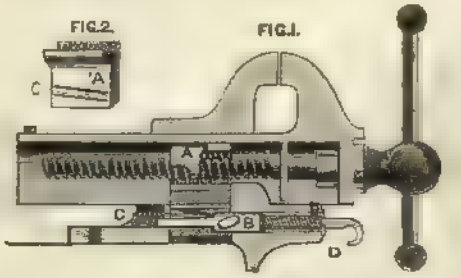
Prentiss' Patent Rapid Transit.



Sectional View of Prentiss Vise Co.'s Rapid Transit Vise.

By a simple movement this Vise may be opened or closed full length, and the Nut will engage the Screw at any point. Among the rare advantages embraced in Prentiss' Rapid Transit Vise all of which are self apparent at sight are the extreme simplicity strength and durability of the plan, the very limited number of parts (there being actually only two pieces more than in an ordinary vise), the positive action, great strength and firmness of the Nut when locked

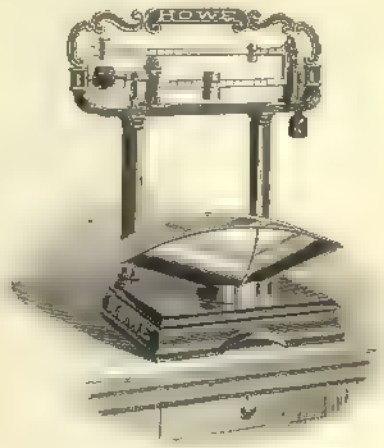
Vermont Counter Scales.



Nos. 593 to 599.

No. 348—Platform Counter, Single Beam, Platform, 18 × 19 in., to weigh 300 lbs. × 2 oz., . . Each, $19 00

This Scale is made entirely of metal, with a Pillar only of sufficient height to be convenient for weighing when the Scales rests on the Counter

No. 593—Vermont Counter, Nickel Plated Double Beam, Extra Large Tin Scoop, weighs from 1 oz. to 200 lbs., ... Each, $24 00
" **594**—Vermont Counter, Nickel Plated Double Beam, Extra Large Brass Scoop, weighs from 1 oz. to 200 lbs , ... " 25 00
" **598**—Vermont Counter, Nickel Plated Double Beam, Marble Platform, without Scoop, weighs from 1 oz. to 200 lbs., ... " 26 00
" **599**—Vermont Counter, Nickel Plated Double Beam, Marble Platform, Brass Scoop, weighs from 1 oz. to 200 lbs., ... " 28 50

This Scale can be used with or without Scoop , has a large platform in proportion to counter room occupied. The beam, being set back, will not interfere with high packages, and being placed above the cap, can be easily read by both merchant and customer.

Bull Nose Rabbet Planes.

Stanley's Patent.

No. 75.

No. 75—Bull Nose Rabbet, Iron Stock, 4 in. long, 1 in. Cutter, . . . Each, $0 50

One in a Box

JOHN PRITZLAFF HARDWARE CO.

Adjustable Iron Planes.

Stanley's Patent.

Improved Rabbet.

No. 190

No. 190—Iron Stock, 8 in. long, 1½ in. wide, with spur, . . Each, $1 15
" **191**—Iron Stock, 8 in. long, 1¼ in. wide, with spur, . . " 1 15

This Plane will lie perfectly flat on either side, and can be used with right or left hand equally well, while planing into corners or up against perpendicular surfaces.

One in a Box

Duplex Rabbet and Filletster.

No. 78

No. 78—Iron Stock and Fence, 8½ in. long, 1½ in. Cutter, . . . Each $1 50

The valuable features of this Plane can be seen by a glance at the illustration given above

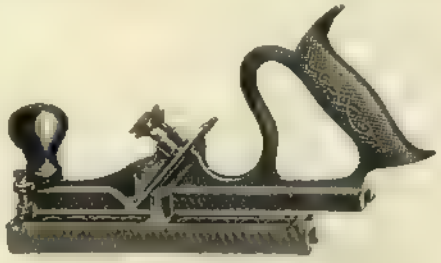
Remove the arm to which the fence is secured, and a Handled Rabbet Plane is had, and with two seats for the cutter, so that the tool can be used as a Bull Nose Rabbet if required.

The construction of the stock is such, that the Plane will lie perfectly flat on either side, and can be used with right or left hand equally well, while planing into corners or up against perpendicular surfaces

The arm to which the fence is secured, can be screwed into either side of the stock, thus making a superior right or left hand Filletster, with adjustable spur and depth gauge.

One in a Box

Tonguing and Grooving.



No. 48.

No. 48.—Iron Stock and Fence, for ¾ to 1¼ in. Boards, . . . Each, $2 5
" **49**—Iron Stock and Fence, for ⅝ to ¾ in. Boards, . " 2 50

This Plane has two separate cutters, a suitable distance apart. When the guide, or fence, is set as shown above, both cutters work and a tongue can be made

The fence is hung on a pivot, and can be swung around, end for end. This movement covers one of the cutters, and also furnishes a guide for grooving an exact match for the tongue.

One in a Box.

Adjustable Beading.

No. 50.

No. 50—Iron Stock and Fence, Complete with Bits, ... Each, $4 00

This Tool, for ordinary beading, or for center beading, can not be surpassed. By adjustment of the fence, center beading can be done up to five inches from the edge of a board. Except for working across the grain, the spurs need not be used.

Each Plane is accompanied by seven Bits, one Each ⅛, 3/16, ¼, 5/16, ⅜, 7/16 and ½ in

One in a Box

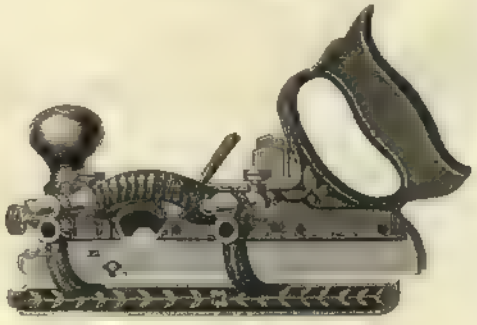
JOHN PRITZLAFF HARDWARE CO.

JOHN PRITZLAFF HARDWARE CO

Adjustable Iron Planes.

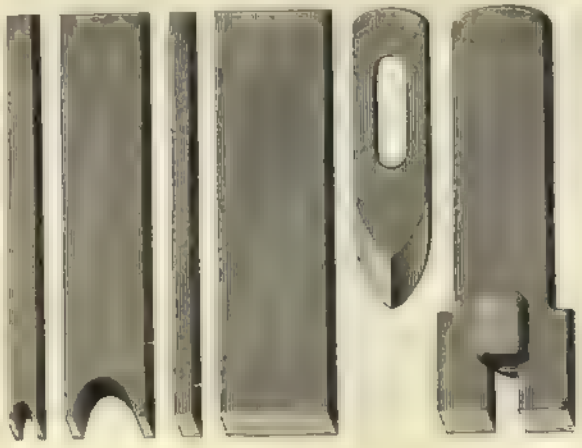
Combined Beading, Rabbet and Slitting.

Traut's Patent.



No. 45.

Samples of Tools, embraced in the Set of Tools, sold with Plane No. 45.



No. 45—Iron Stock and Fence, complete with Bits, ... Each, $8 00

This Plane embraces in a compact and practical form (1) Beading and Center Beading Plane, (2) Rabbet and Filletster; (3) Dado; (4) Plow; (5) Matching Plane; and (6) a superior Slitting Plane.

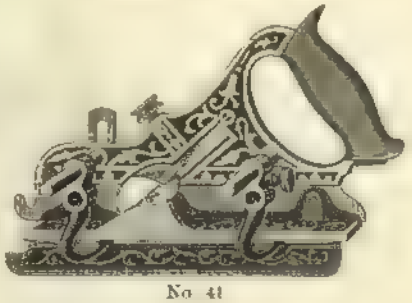
In each of its several forms this Plane will do perfect work, even in the hands of an ordinary mechanic—its simplicity of construction and adaptation of parts (as described in the Directions which accompany each Tool) being easily understood.

☞ Each Plane is accompanied by seven Beading Tools (¼, ⅜, ½, ⅝, ¾, ⅞ and 1 in.), nine Plow and Dado Bits (⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½, ⅝ and ¾ in.), a Slitting Tool and a Tonguing Tool.

One in a Box.

Combined Plow, Filletster and Matching.

Miller's Patent.



No. 41

No. 41—Iron Stock and Fence, . . . Each, $ 9 00
" **42**—Gun Metal Stock and Fence, . . " 12 00

This Tool embraces, in a most ingenious and successful combination, the common Carpenters' Plow, an adjustable Filletster and a perfect Matching Plane. The entire assortment can be kept in a smaller space, or made more portable than an ordinary Carpenters Plow.

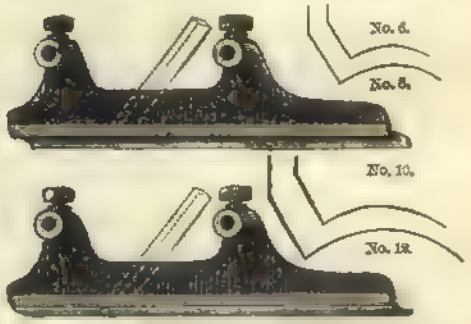
With each Tool eight forged Plow Bits (⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½ and ¾ in.), a Filletster Cutter and a Slitting Blade are furnished; also a Tonguing Tool (⅛ in.), and by use of the latter with the ¾ in. Plow Bit for grooving a perfect Matching Plane is made.

Combined Plow and Matching Plane, without Filletster.

No. 43—Iron Stock and Fence, . . Each, $7 00

One in a Box

Hollows and Rounds.



Nos.	6	8	10	12	
Works,	¾	1	1½	1½	in. Circle.
Per Pair,	$1 40	1 40	1 40	1 40	

These additional parts, for working Hollows and Rounds, can be attached to Plane No. 45, but they are not included in the regular assortment of parts sent out with the Plane, in its original form.

The size, or arc, which each Number will work, is shown above. The Numbers correspond with the regular Lists of common Hollows and Rounds. The size indicated in the list of prices, is not the measurement across the face of the Hollow or Round, but the full diameter of a circle of which it works only an arc.

One Pair in a Box.

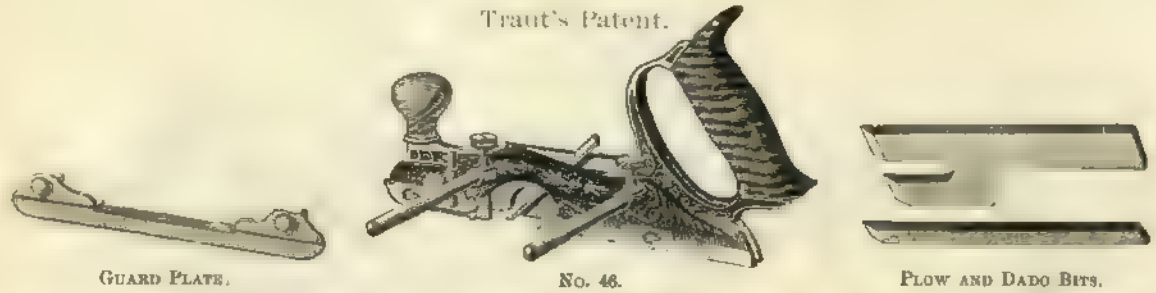
JOHN PRITZLAFF HARDWARE CO

HARDWARE CO. JOHN PRITZLAFF

Iron Planes.

Adjustable Dado, Filletster, Plow, Etc.

Traut's Patent.



Guard Plate. No. 46. Plow and Dado Bits.

No. 46—Traut's Patent, Adjustable Dado, Filletster, Plow, Etc., Iron Stock and Fence, . . Each, $7 00

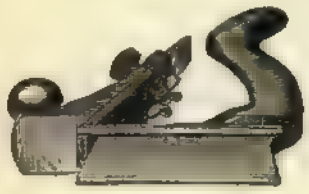
This Tool consists of two sections: A main stock with two bars, or arms, and a sliding section having its bottom or face level with that of the main stock. It can be used as a Dado of any required width by inserting the bit into the main stock and bringing the sliding section snugly up to the edge of the bit. The two spurs, one on each section of the Plane, will thus be brought exactly in front of the edges of the bit. The gauge on the sliding section will regulate the depth to which the tool will cut.

By attaching the Guard plate to the sliding section, the Tool may be readily converted into a Plow, a Filletster or a Matching Plane. It is accompanied by eight Plow-bits (⅛, ¼, ⅜, ½, ⅝, ¾ and ⅞ in.), a Filletster Cutter, a Slitting tool, and a Tonguing tool. All these tools are secured in the main stock *on a skein*.

One in a Box

Chamfer Planes.

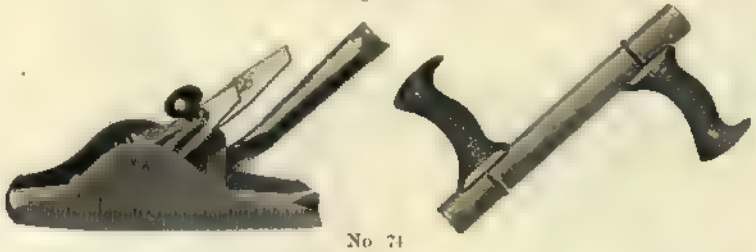
Stanley's Patent.



No. 72

Floor Planes.

Stanley's Patent.



No. 74

No. 72—Stanley's Patent Chamfer Plane, 9 in. long, 1⅝ in. Cast Steel Cutter, ... Each, $3 00
" **74**—Stanley's Patent Floor Plane, 10½ " 2⅜ in. " " " . . . . . " 4 50

The front section of Plane No. 72 is movable up and down. It can be firmly secured to the rear section at any desired point by means of a Thumb screw. Without the use of any other tool, this Plane will do perfect chamfer, or stop chamfer, work of all ordinary width. When the two are clamped together so as to form an even base line, the tool can be used as an ordinary Bench Plane.

The No. 74 Floor Plane will be found useful for planing Floors, Bowling Alleys, Skating Rinks, Decks of Vessels etc. The construction of the Plane will enable the owner to do more work, and with less outlay of strength, than can be done with any other tool. The weight of the Plane is about 10 lbs., and the full length of the handle, 45 in.

One in a Box

Universal Hand Beaders.

Stanley's Patent.

No. 66

Veneer Scrapers.

Bailey's Patent.

No. 12

No. 12—Bailey's Patent Adjustable Veneer Scrapers, 3 in. Cast Steel Cutter, ... Each, $3 50
" **66**—Stanley's Patent Universal Hand Beaders, Iron Stock, with 7 Cast Steel Cutters, ... " 1 00
Extra Cutters or Blanks for No. 66 Beader . . . . . " 05

The No. 66 Hand Beader can be used for Beading, Reeding or Fluting straight or irregular surfaces, and is invaluable to wheelwrights. Seven superior steel cutters go with each tool. Both ends are sharpened, thus embracing six ordinary sizes of Beads, four sets of Reeds, two Fluters and a double Router Iron (¼ and ½ in.).

One in a Box

JOHN PRITZLAFF HARDWARE CO. HARDWARE CO JOHN PRITZLAFF

HARDWARE CO. JOHN PRITZLAFF

Woodworker's Handy Router Planes.

Stanley's Patent.

No. 71—Iron Stock, with Steel Bits, ¼ and ½ in., ... Each, $1 50

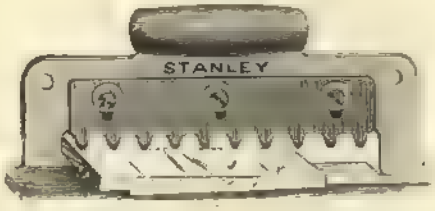
This Tool should be added to the kit of every skilled Carpenter, Cabinet Maker, Stair Builder, Pattern Maker or Wheelwright. It is perfectly adapted to smooth the bottom of grooves, panels, or all depressions below the general surface of any woodwork.

The Bits can also be clamped to the backside of the upright post, and outside of the stock. In this position they will plane into corners, or will smooth surfaces not easily reached with any other tool

One in a Box.

Adjustable Clapboard Markers.

Stanley's Patent.



No. 88—Metal Stock, with Wood Handle, Steel Blade, ... Each, $0 50

This ingenious Tool can be used with one hand, while the other is employed in holding a clapboard in position. The marking blade is easily adjusted to any thickness of clapboard, or siding

The sharp edges of the teeth are just parallel with the legs when placed against the corner board, or window casing; and by moving the tool half an inch, it will mark a full line across the clapboard, exactly over and conformed to the edge of the corner-board. There is then no difficulty in sawing for a perfectly close joint

One in a Box

Adjustable Clapboard Gauges.

Stanley's Patent.

No. 89—Metal Stock, Wood Handle, Steel Blades, ... Each, $0 50

A simple and practical Clapboard Gauge, or Holder, is needed by Carpenters; and is offered them in this tool.

Two thin Steel Blades, which form a part of the base of the tool, will slide under the last clapboard already laid (see broken corner in engraving)

When the bottom of the gauge is brought firmly up to the lower edge of this clapboard, press the handle over sidewise, and this will force another thin blade down into the next lower clapboard, rendering the tool immovable

The clapboard to be laid, can be held any width to the weather, by means of the graduated scale on the tool; and after the tool is released, the mark left is so slight that painting alone will fill it.

☞ A full set of three Gauges is recommended, for laying long clapboards or siding.

Three in a Box.

Explanatory.

This is a representation of the Slitting-Tool on Planes Nos. 41 42, 43, 45 and 46 The improvement is an important one as carpenters who have not the convenient use of circular saws, can with the Slitting-Tool rapidly slit up their stuff for fitting up doors and windows, or kindred work

The Slitting-Tool is inserted into a slot on the right side of the main stock of the Plane, and just in front of the handle, a steel depth-gauge is placed over it on the same spindle, and both are fastened down by a brass thumb-screw

The position of the Slitting-Tool being right under the hand of the workman, his full strength can be exerted: while the construction of the Plane renders it stiff enough to ensure perfect accuracy in working

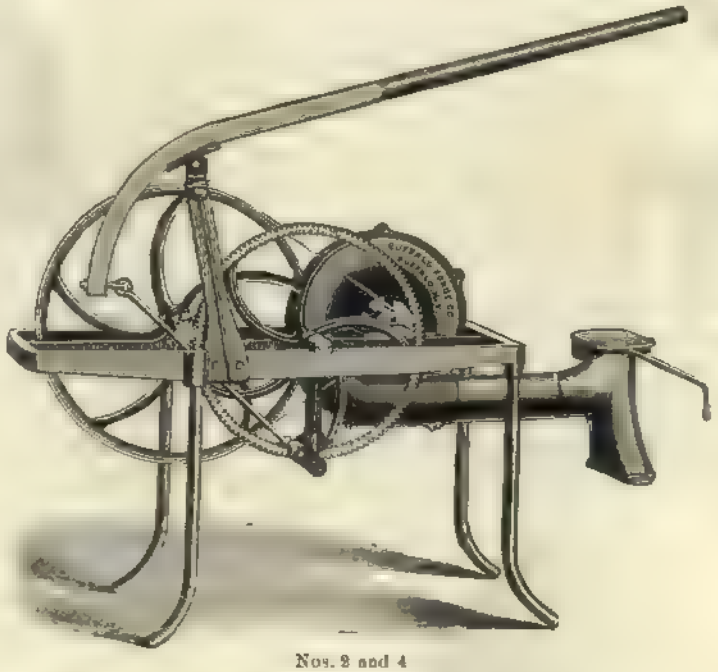
Buffalo Blacksmiths' Hand Blowers.



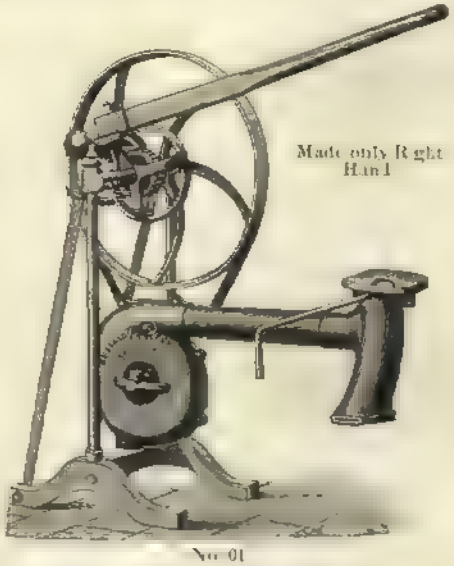
Nos. 2 and 4

No. 2—Hand Blower. Size of Fan, 14 in.; Height, 35 in.; Length, 32 in.; Weight, 130 lbs. without Tuyere, Each, $30 00
" **2**— " " " " " " " " " " " 150 " with " " 32 00

No. 2 Blower is designed for all ordinary Blacksmith purposes, producing a welding heat on 3-in. iron in five minutes, and on 4 in. iron in ten minutes; heavier work can be done if desired

No. 4—Hand Blower, Size of Fan, 17 in.; Height, 35 in.; Length, 35 in., Weight, 225 lbs. without Tuyere, Each, $34 00
" **4**— " " " " " " " " " " " 245 " with " " 36 00

No. 4 is the largest Hand Blower made, and is especially designed for flange fires in boiler shops and extra heavy work in shipsmiths' shops, and will do heavier work than any other Hand Blower made



Made only Right Hand

No. 01

Adapted for use of Blacksmiths' in general. Made Right or Left Hand. This cut represents a Right Hand Blower

No. 3

No. 01—Hand Blower, Size of Fan, 14 in.; Weight, 120 lbs. without Tuyere, Each, $2 00
" **01**— " " " " " " " " 140 " with " " 25 00
" **3**— " " " " " " " " 110 " without " " 23 00
" **3**— " " " " " " " " 130 " with " " 25 00

Blacksmiths' Drills.

Coe's Bench.

No. 00.

No. 0.

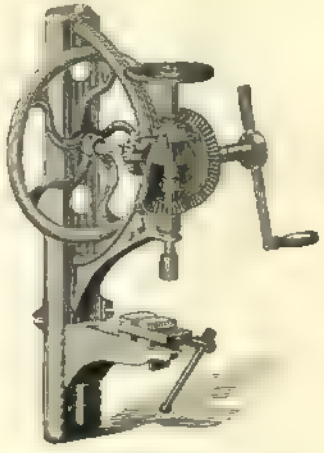
No. 00—Coe's Bench Drill, Weight, 40 lbs, ... Each, $12 00

This Machine is single geared compact in construction, and suitable for light work Has a vertical motion of 2½ inches Drills to Centre of 10 in. Circle

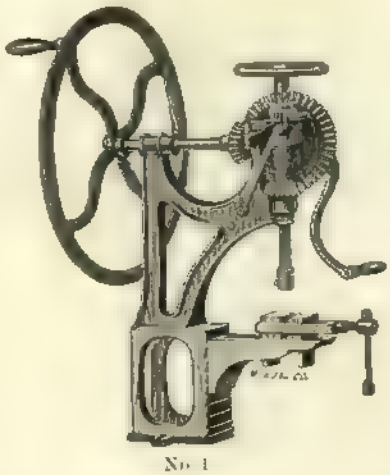
No. 0—Coe's Bench Drill, Weight, 80 lbs., ... Each, $25 00

This Machine is suitable for Carriage and Blacksmith work, and ordinary drilling. It is not a self feeding Machine. Drills to Centre of 14 in Circle

Coe's Upright.



No 4



No 1

No. 1—Coe's Upright Drill, with Vise, Double Geared, Weight, 125 lbs., ... Each, $40 00

This Machine is improved in design, and has self feed and vise, which are adjustable, and will work with or without them, as may be desired It has no equal in the market for Carriage and Blacksmith work Will drill a hole 1 inch in diameter with perfect safety By using the side crank speed is obtained for drilling small holes By using the fly wheel crank gives power and 1 in holes can be drilled with same strength as one half inch holes can be drilled with side crank Drills to Centre of 18 in Circle

No. 4—Coe's Upright Post Drill, with Vise, Weight, 125 lbs., ... Each, $37 50

This is the most powerful Post Drill for its size on the market, adding to its other merits a larger sweep than any machine made. It is self feed, and has a vertical motion of 3 inches. Drills to Centre of 24 in. Circle

Shears and Punches.

Detroit Iron Shears.

Black Giant Punches.

Detroit Iron Shears, ... Each, $25 00

This is a powerful but simple Compound Lever Machine made especially for use of Shops and Merchants who have occasion to cut iron bars. One blade is adapted to shearing cold iron and the other hot, so that the temper of the steel for cutting cold iron need never be impaired by heat. This advantage will be immediately recognized by all who have occasion to cut large sizes by hand. It will cut ¾ in. round or square bar, and 4x½ in. cold. Hot up to 2½ in. or 4x1½ in.

Black Giant Punch, Shear and Shrinker combined, with two ⅞, one ⅝ and one ¾ in Punch, Weight, 440 lbs., Each, $60 00

This Machine is guaranteed to cut ¾ in square and round, and 3x⅜ in flat Iron will punch ⅝ in thick, and upset 1¼x¾ in Tire

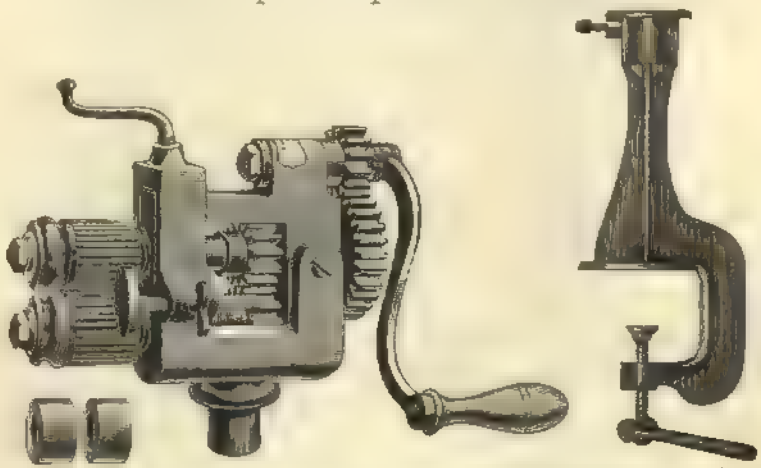
Stove Pipe Crimpers and Beaders.



No. 7. Patent Standard, used with Crimping Machine.

No. 7—Stove Pipe Crimpers and Beaders, Complete with Standard, ... Each, $12 00

This Machine is designed to facilitate the making and putting together of metal pipe of different diameters. It crimps and turns in the edges of stove and conductor pipe so that the lengths are put together easily. It is also provided with beading rolls, which bead the pipe at the same time it is corrugated. This Machine is substantially and well made, it has cut gearing and steel rolls. When Crimping only is desired, substitute the Collars in place of the O. G. Rolls.

Solid Wiper, Adjustable Handle.

Inches,	10	12	14	16	18
Each,	$13 00	15 00	17 00	19 00	21 00

The Cream City and Famous Lawn Mowers have the following points of Merit: A Light Mower, easy running and simple in construction. Rear Cut, bearing Cutting Bar of Solid Cast Steel, with adjustable roller. Cast Steel tempered Knives. Easy Draft. Increased Gear. No dirt or grass can enter the running gear to obstruct the working. Adjustable Handle, enabling the same Mower to be used by a small child or large man. Noiseless Ratchet, with self-adjusting pawl, that engages positively upon drawing the Mower backwards. Extra strength. Although light in weight, they are substantially made, and having large bearings, with their use a long time with little oil. Light Draft, simple in construction, neat in appearance, unsurpassed for durability. Every Mower guaranteed to work as represented.

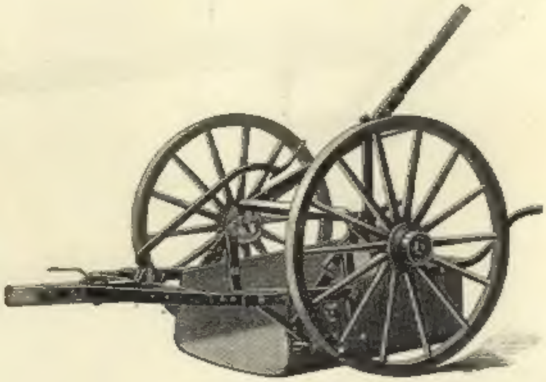
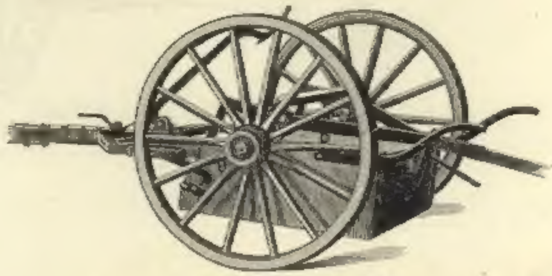
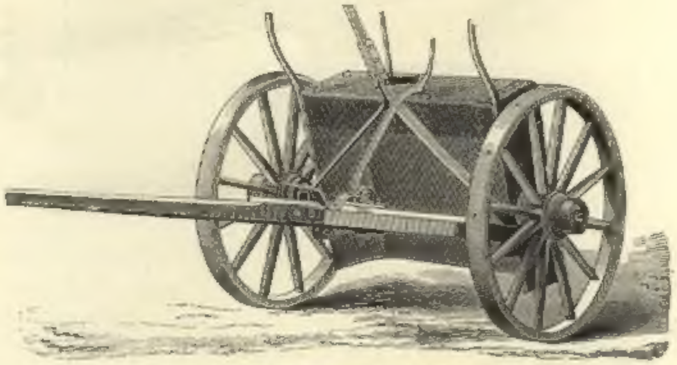
Western Wheel Road Scrapers.



In Position to Scrape.



Position when Loaded.



Position when Dumping.

No. 1—Western Wheel Scrapers, Hold	9 Cubic ft.,	Weight 340 lbs.,	Each,	$45 00
" **2**— " " " "	12 " "	" 450 "	"	50 00
" **3**— " " " "	16 " "	" 590 "	"	55 00

The Box of the Western Wheel Scraper is made of one piece of steel, bent up in curved lines at the sides and back, attached to a steel frame which suspends it from an iron axle, so that when loaded, the whole weight is carried on two wheels provided with broad tires to prevent their sinking in loose ground, which reduces the friction to the lowest point, and makes the lightest possible draft. An ordinary team will handle one containing half a yard of earth with greater ease than it will a common Drag Scraper holding only one-eight of a yard, and will make as many trips with one as the other, making an immense saving in the cost of handling earth.

It fills in any kind of soil in which the Drag Scraper will fill, does not waste, and can be used on embankments of any height.
